2021 Economy Review - a year of rebound

2021 - A swift, split, and stimulus-propelled global rebound year. Major economies were able to recover from the initial slowdown. However, just as the world was turning optimistic about returning to normalcy, having put the Delta variant surge behind, and with vaccination levels nearing the threshold, a new variant, Omicron, has brought about a fresh round of uncertainty.

At home, we faced the worst time from March to June due to the second wave of COVID-19; but, if we look at the end of the year, most of the restrictions are uplifted and macroeconomic data has gradually improved. Unlike, at the start of the year, India appears to be in a very strong position relative to the rest of the world led by improvement in vaccination rate and demand normalization.

Global economy and central banks

At the dawn of 2022, all major global central banks, including the Fed, seem to be entering into the monetary policy normalization phase, with the tapering being the most common starting point. This is in sharp contrast to 2021, when all the major central banks were committed to “lower rates for longer.” Despite the new variants creating uncertainty, the yields have moved up as a result of central bank actions and economic recovery.

Global yields normalizing

Source: Bloomberg, RBI website, IMF- World Economic Outlook Update. As of 31st Dec 2021. Above data is obtained from Bloomberg which may or may not come true.

US Fed actions

Macro data shows resilience

Global and domestic economy has shown remarkable resilience. US Jobless claims have improved from 787K to 222k. Also, PMI is up from 57.1 to 58.3 for the US and 55.2 to 58.5 for Eurozone. This recovery is despite the new variant led disruption and also higher crude prices which were up from a low of USD 19/bbl in 2020 to a high USD85/bbl in 2021 due to limited supply from OPEC+.

The Indian economy seems to be roaring back to the pre-pandemic levels despite the severe second wave, and appears to be poised for above-trend growth in 2022 (GST collections consistently above INR1t, rail freight growing at 10-12% YoY, and property sales on an uptrend), assuming a normal scenario. With regard to economic growth, a marked improvement is seen, with GDP likely to grow 9-10% in FY22 (as per the IMF) from a sharp contraction in FY21.

Govt. action - prioritizing growth over fiscal

Growth has been a higher priority for fiscal as well as monetary authorities. The fiscal situation has been well-managed with a steady pace of expenditure, while tax revenues have been fairly buoyant. The government remains on track to meet the GFD/GDP target of 6.8% in FY22, without any additional borrowings v/s the budget estimates.

The external sector balance has remained comfortable, although the trade deficit has widened significantly over the last few months. Current account deficit came in at a surplus in 2QCY21 and moved back into deficit subsequently. The RBI's FX reserves of around USD635b, built through positive BOP through the year, provide a buffer against any sharp and sustained depreciation bias on the INR.

Proactive RBI actions

In 2021 as well, the RBI was extremely proactive and innovative in undertaking a series of actions to safeguard market stability by ensuring adequate liquidity and management of the yield curve. India stands out as, perhaps, the sole exception at the moment - at its December policy review, the RBI reinforced its ultra-loose accommodative stance, supported by relatively better behaved headline inflation, largely staying within its target band of 2-6% and armed with a strong forex kitty well in excess of USD600b (among the Top 5 in the world).

It now endeavors to restore the revised liquidity management framework instituted in February 2020 by actions through VRRR increased

pace and quantum. Inflation remains a concern

Inflation remains one of the key concerns this year as well. The unrelenting onslaught of inflation in the second half of 2021 - with the year ending at a nearly 40-year high reading of 6.8% on the headline CPI in the US, for example - has left central banks with little choice. However, uncertainties arising out of the highly transmissible Omicron variant, perhaps, warrant a bit more patience, so the solid gains from an accommodative policy

framework in the last two years, when the pandemic has ravaged the world, are not lost.

Inflation in India has surged to nearly 6%, closer to the upper band of the RBI threshold, due to a) supply-side disruption and b) a rise in the food, vegetable, and fuel components. However, at the start of 2021, inflation had moderated largely on favorable base effects, which started to rise yet again from May due to an increase in the food, energy, and core components. Inflation was back in the moderation phase from September on account of subdued food inflation. At the end of 2021, upside risks to inflation remained on account of the ongoing energy crisis, supply-side disruptions / pending price hikes, and adverse base effects.

2021 Debt Market Review - a year of action

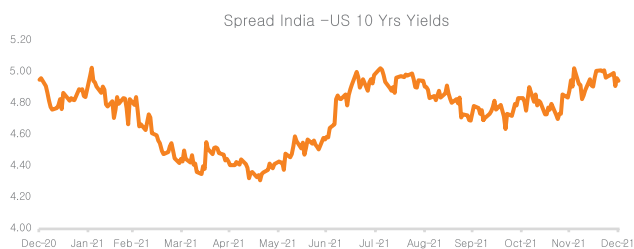

During the year, while the yields have moved up across the tenures, the shorter end of the curve has moved up more aggressively led by VRRR auctions. This in turn has led to yield curve flattening much in line with the global yield curves.

In the first half of the year, RBI undertook regular OMOs and injected additional liquidity under G-SAP 1.0. A purchase and sale auction under 'Operation Twist' was also conducted to facilitate the smooth evolution of the yield curve. The aim was to shift from time-based guidance to state-based guidance and soften interest rate policy for sustainable growth.

The second half of the year saw hardening of yields due to the indication of tapering and central banks' making a cautious move on policy normalization, leading to the flattening of the yield curve. Many central banks went for rate hikes and the Fed started tapering. Also, in its last Fed meeting, there was a readiness among the members to consider rate hikes in 2022.

Money Market yields that were trading near the reverse repo rate, started to shift towards the repo rate as the RBI moved ahead with liquidity normalization. Mid- and long-term yields gradually moved up over the course of the year owing to stable macroeconomics and US Treasury.

Source: CCIL, Bloomberg, RBI, as on 31st Dec 2021. Above yields are in %. Past Performance may or may not sustain in Future.

The biggest concern today seems to be the easy breakthrough tendency of the Omicron variant, even against those already infected or fully vaccinated. Hence, many nations are putting additional restrictions on travel and mobility; the broader indication is that there would be no mass scale complete shutdowns as those during the first wave, as also indicated by the US president at a press conference held just ahead of Christmas.

A new round of disruption by Omicron may result in further tenacity in inflation dynamics. Thus, at the global level, 2022 starts on a cautionary note due to Omicron, an optimistic note on account of economic momentum, and a concerning note due to inflation. So, the two questions that most will want an answer to right now are: 1) Will the ongoing taper eventually extend to multiple rates hikes later in 2022, as projected currently? 2) Will the RBI be able to maintain its standalone accommodative stance for long enough against the global trend?

Equity Market 2022 Outlook

We believe India has entered a period of strong economic and earnings growth. The key pillars for earnings growth are as follows:

Stable macros and reforms to improve growth: We believe India has entered a period of strong growth given the stable macros related to forex, current account, inflation, and interest rates. Moreover, supportive government policy and ongoing reforms - such as GST, IBC, RERA, labor laws, and the focus on manufacturing via PLI - would aid medium-term recovery.

Revival in Housing cycle: A decisive turnaround is seen in the Housing sector following a seven-year slowdown. The revival is attributable to the best affordability in two decades, driven by low interest rates and benign property prices.

Improvement in Banking sector: System-wide gross non-performing loans have reduced by 400bps in the last four years. We believe the reversal of the bad loan cycle should help improve profitability and lending capacity.

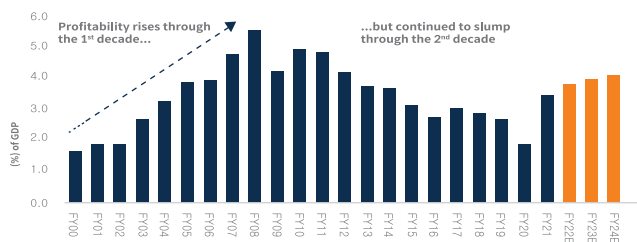

Formalization and consolidation: Multiple factors have led to consolidation in multiple sectors, with strong companies getting stronger and weaker ones being marginalized. The massive consolidation comes as a result of back-to-back events such as the demonetization, GST regime, digital acceptance, and various reforms. This consolidation is a positive for the Top 500 companies.

Improved outlook for IT sector: The IT sector has witnessed the best period recently owing to the front-loading of demand and cost savings in demand fulfillment. The sector would give best-in-a-decade salary increases, which is a positive for the Consumer Discretionary business.

Deleveraging: Corporate debt/equity has reduced from 1x to 0.6x in the last six years. We have particularly seen massive improvement in balance sheets in the Metals sector, which is not geared for new capex.

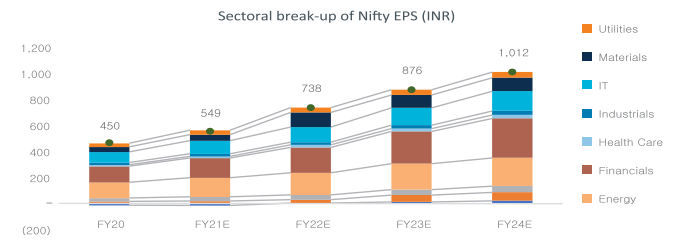

Improving corporate profitability and ROE: We believe corporate profitability is at an inflection point and would result in meaningful earnings growth. Corporate profit to GDP reached multi-year lows of 1.8% in FY20. Thereafter, it has now already improved to 3.5% and is likely to improve further. Resultantly, corporate ROE at 12.5% is at seven-year highs.

Corporate profit to GDP ratio to improve

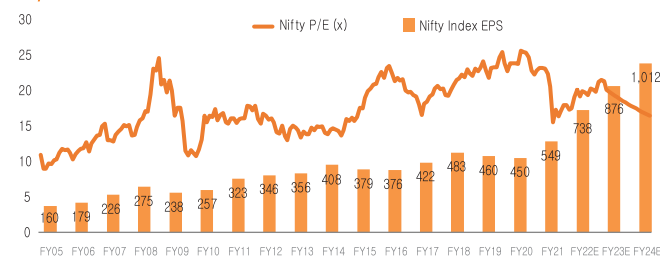

Source: Factset, CME, Jefferies, as on 31st Dec, 2021. Past Performance may or may not sustain in Future.

Consensus estimates indicate broad-based earnings growth for Nifty companies

Source: Bloomberg, as on 31st Dec 2021. Past Performance may or may not sustain in Future.

Nifty 50 index valuations reasonable

Source: Bloomberg. Data as of 31st December 2021. Past Performance may or may not sustain in Future.

We are constructive on equities: Equity market returns are a function of earnings growth, valuation, interest rate, and flows. As mentioned above, India is on the cusp of achieving robust growth over the next few years. The Nifty index is currently trading at about 17x FY24E earnings, which is at an aggregate-level small premium to historical averages. However, we believe valuations are reasonable given the expectation of 22% earnings growth over FY20-24 as well as low cost of capital.

We believe domestic flows would remain strong given the low penetration of equities within household savings. FII flows would also improve over the medium term as India remains among the fastest growth economies.

We would advise investors not to time the market and invest in equities for the long term within their earmarked asset allocation in a disciplined way (based on one's risk profile). The staggered investments through SIPs or STPs would remain the best ways to invest in equities.

In the current market context, one can keep higher allocation towards largecaps and hybrid category funds, and have a relatively higher investment time horizon for midcaps and any sectoral funds.

Monitorable risks: COVID variants remain a key near-term risk - however, evidence of the infections having less severity, along with high vaccination rates in India, would help mitigate this risk. Apart from the customary oil price volatility, any disruptive Fed tightening and China-related events need to be monitored.

We believe valuations are reasonable given the expectation of 22% earnings growth over FY20-24 as well as low cost of capital. We are positive on discretionary, financials which would benefit in the recovery period and some relatively stable sectors like Healthcare, IT along with some B-B businesses and few value names.

Debt Market 2022 Outlook

Extrapolating the present trend would suggest that global central banks would follow through on the current tapering schedule with a shallow rate hike cycle. The market seems to price 3-4 rate hikes of 25bps each in the US. Although, the possibility of consistent disruption from Omicron or subsequent variants and a relapse into economic slowdown in the absence of further fiscal boost (such as seen in 2021) may not cause an aggravated tightening cycle, which may peak with rates still in accommodative zone.

After remaining abnormally high last year, a strong base effect and slowing momentum may result in headline inflation beginning to somewhat relent. The obsession central banks have with not tolerating any market disruption provides hope that the ongoing normalization process may be as disruptive as historically observed. As such, the consensus view in the global markets is that the curve would flatten. Broadly, analysts expect short-term rates to move up in line with the taper and rate hikes by the central banks.

As for India, the RBI's unequivocal guidance remains that of overarching support for sustainable growth, while keeping a hawk-eye on inflation. With strong and improving macro fundamentals domestically, the only factor that may divert regulators towards an accelerated tightening may have to come from an external sector. That may be faster than the currently projected global rate hike cycle, any major forex outflow from Indian markets, or any disruption in the emerging markets or similar.

The RBI has currently been calibrating system liquidity by gradually increasing the variable rate reverse repo auction amounts and extending the tenure that may shift the operative overnight rate towards 4% in due course. While it could be a de-facto rate hike of 65bps, it may allow the RBI to retain the flexibility to respond to the evolving situation without falling behind the curve. As such, the expectation is that liquidity would gradually normalize in 1H2022. Any possible repo rate hike may only come in the latter part of the year, going by the current guidance from regulators. Thus, we expect the yield curve to flatten, with short-term rates moving up more than long-term rates.

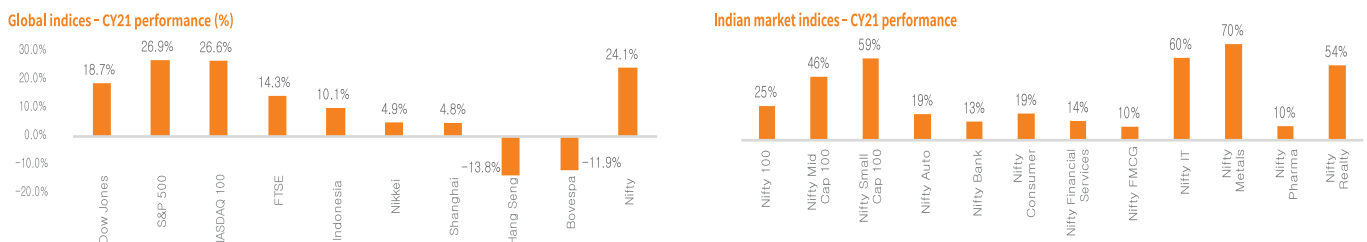

Looking at the scenario, the year ahead will likely continue to throw up volatility. Investors may look for the strategy with exposure at the shorter end (0 - 3 months) and medium end (3 - 5 years) of yield curve in line with their Investment horizon and risk appetite. This strategy will allow to take advantage flattening curve.

After a strong rebound in 2020, the markets continued their momentum in 2021 as well. The equity markets were buoyant as the earnings momentum was strong and priced in strong economic recovery and, consequently, strong growth in near-term earnings. An upbeat investor mood enabled strong participation in the primary markets from private companies.

In 2021, the equity markets witnessed a steady increase from May to October and were quite volatile towards the end of the year, gaining 24% CY21 (local currency), after gaining 15% YoY in CY20. 2021 can go down as the year of "Midcap and Smallcap" as Midcap100/Smallcap100 outperformed the Nifty on account of the broader markets outperforming the largecaps in CY21.

Globally, India has outperformed peers (barring the US and Taiwan), including the Emerging Markets. In fact, had it not been for the recent Omicron concerns, returns would have been much higher. Also, the breadth of the market was encouraging as the median return in the BSE500 index was 43% in 2021, with 85% of the stocks yielding positive returns and 20% doubling during the year. Furthermore, returns were led by a change in earnings rather than valuation re-rating (as seen in 2020). Hence, to that extent, the year was better qualitatively.

The period saw net FPI inflow of USD3.8b (primary market inflow of USD10.8b and secondary market outflow of USD7b), while DII inflows stood at USD12b. In CY2021, 63 companies had raised USD15.4b from IPOs, the highest ever since 2017, when 36 companies had raised USD10.3b.

Source: Bloomberg, as on 31st Dec, 2021. Past Performance may or may not sustain in Future.

With regard to sectors, returns were mainly led by global cyclicals and IT, while domestic cyclicals such as Banks and Autos underperformed. The outperforming sectors saw sharp improvement in earnings as well as their balance sheets.

We anticipate global central banks to follow through on the current tapering schedule with a shallow rate hike cycle, but for RBI only external factor may divert regulators towards an accelerated tightening. Overall, we expect the yield curve to flatten, with short-term rates moving up more than long-term rates.

How to read a Mutual Fund Factsheet?

Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

Five things to look out for in mutual fund factsheets

Basic information

The factsheet provides all the general information on the fund – its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight funds generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

Equity Fund

Product Labeling

This product is suitable for investors who are seeking:

- Growth of capital in the long term
- Investment predominantly in equity and equity-related instruments

Debt Fund

Product Labeling

This product is suitable for investors who are seeking:

- Optimal returns in the short term
- Investment in portfolio of short duration money market and debt instruments

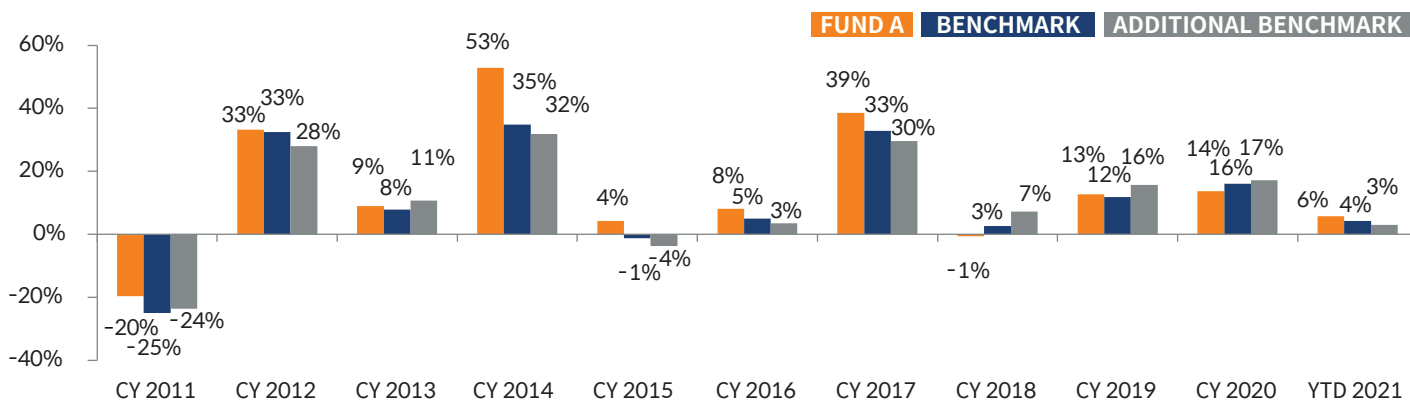

The data used is for illustration purpose only.

Performance aspects

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

The data used is for illustration purpose only.

Performance Report

Fund Return (%)	19.26%	18.15%	20.45%	16.38%	26.03%
Benchmark Return (%) (Nifty 100 TRI)	11.87%	11.57%	13.45%	10.96%	21.24%
Add. Benchmark Return (%) (S&P BSE Sensex)	9.95%	9.31%	10.19%	7.02%	16.72%

The data used is for illustration purpose only.

Fund manager details

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well.

The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

Portfolio aspects

Key portfolio attributes to look for in equity/ hybrid funds

Asset allocation

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

Company and sector allocation

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to riskier sectors or low quality stocks.

Portfolio Top 10 holdings % Allocation

Company	% Allocation
Equity Shares	
HDFC Bank Ltd	7.05%
ICICI Bank Ltd	6.34%
Larsen & Toubro Ltd	3.96%
IndusInd Bank Ltd	3.81%
State Bank of India	3.79%
HDFC Ltd	3.72%
Maruti Suzuki India Ltd	3.38%
Infosys Ltd	3.17%
Kotak Mahindra Bank Ltd	2.93%
ITC Ltd	2.91%
Other Equities	53.77%
Equity Holding Total	94.83%
Cash & Other Receivables	5.17%
Total	100.00%

Allocation - Top 10 Sectors

The data used is for illustration purpose only.

Key portfolio attributes to look for in debt funds

Credit quality profile

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

The data used is for illustration purpose only.

Instrument break-up

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short-term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

The data used is for illustration purpose only.

2021-22

Tax Reckoner

Snapshot of Tax rates specific to Mutual Funds

The rates are applicable for the financial year 2021-22 as per Finance Act, 2021

Income-tax implications on income in respect of units of Mutual Fund

Type of Investor	Withholding tax rate
Resident***	10%*
NRI	20%**

* Tax not deductible if dividend income in respect of units of a mutual fund is below Rs. 5,000 in a financial year.

** The base tax is to be further increased by surcharge at the rate of:

- 37% on base tax where specified income exceeds Rs. 5 crore;
- 25% where specified income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore

Specified income – Total income excluding income under the provisions of section 111A and 112A of the Income-tax Act, 1961 ('the Act')

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge

*** As per section 139AA of the Income tax Act, 1961 ('the Act') read with rule 114AAA of the Income-tax Rules, 1962, in the case of a resident person, whose PAN has become inoperative due to PAN –Aadhaar not being linked on or before 30 June 2021, it shall be deemed that he has not furnished the PAN and tax could be withheld at a higher rate of 20% as per section 206AA of the Act.

		Short term capital gains[§]	Long term capital gains[§]
Equity oriented schemes		15%	10%*
Other than equity oriented schemes		30% [^]	10%** (for unlisted) & 20% [^] (for listed)

* Income-tax at the rate of 10% (without indexation benefit and foreign exchange fluctuation) to be levied on long-term capital gains exceeding Rs. 1 lakh provided transfer of such units is subject to Securities Transaction Tax ('STT').

§ Surcharge to be levied at:

- 37% on base tax where specified income exceeds Rs. 5 crore;
- 25% where specified income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

Specified income – Total income excluding income by way of dividend or income under the provisions of section 111A and 112A of the Act.

Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10 percent to be levied on base tax for the companies opting for lower rate of tax of 22%/15%. Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

Short term/ long term capital gain tax (along with applicable Surcharge and Health and Education Cess) will be deducted at the time of redemption of units in case of NRI investors.

& After providing indexation.

** Without indexation.

[^] Assuming the investor falls into highest tax bracket.

^{^^} If total turnover or gross receipts in the financial year 2019-20 does not exceed Rs. 400 crores.

^{^^^} This lower rate is optional and subject to fulfillment of certain conditions as provided in section 115BAA.

^{^^^^} This lower rate is optional for companies engaged in manufacturing business (set-up & registered on or after 1 October 2019) subject to fulfillment of certain conditions as provided in section 115BAB.

Further, the domestic companies are subject to minimum alternate tax (except for those who opt for lower rate of tax of 22%/15%) not specified in above tax rates.

Transfer of units upon consolidation of mutual fund schemes of two or more schemes of equity oriented fund or two or more schemes of a fund other than equity oriented fund in accordance with SEBI (Mutual Funds) Regulations, 1996 is exempt from capital gains.

Transfer of units upon consolidation of plans within mutual fund schemes in accordance with SEBI (Mutual Funds) Regulations, 1996 is exempt from capital gains.

Relaxation to non-residents from deduction of tax at higher rate in the absence of PAN subject to them providing specified information and documents.

The Finance Act, 2021 introduced section 206AB (applicable from 1 July 2021) stating that tax to be deducted at twice the applicable rate in case of payments to specified person (except non-resident not having permanent establishment in India) who have not filed return of income for past two assessment years for which time limit for filing return has expired and the aggregate of tax deducted at source in his case is Rs. 50,000 or more in each of these two years. Additionally, if provisions of section 206AA are also applicable then tax to be deducted at higher of the two rates provided i.e. rate as per section 206AB or section 206AA.

Bonus Stripping: The loss due to sale of original units in the schemes, where bonus units are issued, will not be available for set off; if original units are: (A) bought within three months prior to the record date fixed for allotment of bonus units; and (B) sold within nine months after the record date fixed for allotment of bonus units. However, the amount of loss so ignored shall be deemed to be the cost of purchase or acquisition of such unsold bonus units.

1. Income Tax Rates

Option A

For Individuals, Hindu Undivided Family, Association of Persons, Body of Individuals and Artificial juridical persons

Total Income	Tax Rates
Up to Rs. 2,50,000 ^{(a)(b)}	NIL
Rs. 2,50,001 to Rs. 5,00,000 ^{(d)(e)}	5%
Rs. 5,00,001 to Rs. 1,00,00,000 ^(d)	20%
Rs. 10,00,001 and above ^{(c)(d)}	30%

(a) In case of a resident individual of the age of 60 years or above but below 80 years, the basic exemption limit is Rs. 300,000.

(b) In case of a resident individual of age of 80 years or above, the basic exemption limit is Rs 500,000.

(c) Rate of surcharge

- 37% on base tax where specified income exceeds Rs. 5 crore;
- 25% where specified income exceeds Rs. 2 crore but does not exceed Rs. 5 crore
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs 50 lakhs but does not exceed Rs. 1 crore. Specified income – Total income excluding income under the provisions of section 111A and 112A of the Act. Marginal relief for such person is available.

(d) Health and Education cess @ 4% on aggregate of base tax and surcharge.

(e) Individuals having total income not exceeding Rs. 500,000 can avail rebate of lower of actual tax liability or Rs. 12,500.

Option B

The Finance Act, 2021 has proposed New Personal Tax Regime: Total Income

Total Income	Tax Rates
Up to Rs. 2,50,000	NIL
Rs. 2,50,001 to Rs. 5,00,000	5%
Rs. 5,00,001 to Rs. 7,50,000	10%
Rs. 7,50,000 to Rs. 10,00,000	15%
Rs. 10,00,001 to Rs. 12,50,000	20%
Rs. 12,50,001 to Rs. 15,00,000	25%
Rs. 15,00,001 and above	30%

For adopting Option B, most of the deductions/exemptions such as section 80C, 80D, etc. are to be foregone. The aforesaid regime is optional. Accordingly, Individuals and HUFs have the option to be taxed under either of the options. Option B once exercised can be changed in subsequent years (not applicable for business income).

2. Securities Transaction Tax (STT)

STT is levied on the value of taxable securities transactions as under:

Transaction	Rates	Payable by
Purchase/ Sale of equity shares (delivery based)	0.1%	Purchaser/ Seller
Purchase of units of equity oriented mutual fund	NIL	Purchaser
Sale of units of equity oriented mutual fund (delivery based)	0.001%	Seller
Sale of equity shares, units of business trust, units of equity oriented mutual fund (non-delivery based)	0.025%	Seller
Sale of an option in securities	0.05%	Seller
Sale of an option in securities, where option is exercised	0.125%	Purchaser
Sale of an futures in securities	0.01%	Seller
Sale of units of an equity oriented fund to the Mutual Fund	0.001%	Seller
Sale of unlisted equity shares and units of business trust under an initial offer	0.2%	Seller

3. Special rates for non-residents as per domestic provisions

(1) The following incomes in the case of non-resident are taxed at special rates on gross basis:

Transaction	Rates(a)
Dividend	20%
Interest received on loans given in foreign currency to Indian concern or Government of India (not being interest referred to in section 194LB or section 194LC)	20%
Income received in respect of units purchased in foreign currency of specified Mutual Funds / UTI	20%
Royalty or fees for technical services ^(b)	10%
Interest income from a notified infrastructure debt fund, specified loan agreement, specified long term bonds, rupee denominated bonds(c) and business trust	5%
Interest on FCCB, Dividend on GDRs	10%

(a) These rates will be further increased by applicable surcharge and health and education cess.

(b) In case the non-resident has a Permanent Establishment (PE) in India and the royalty/ fees for technical services paid is effectively connected with such PE, the same is taxable at 40% (plus applicable surcharge and health and education cess) on net basis.

(c) Interest payable to a non-resident in respect of monies borrowed by any Indian company or business trust from a source outside India by way of issue of rupee denominated bond during the period 17 September 2018 to 31 March 2019 is exempt from tax.

(2) Tax on non-resident sportsmen or sports association on specified income @20% plus applicable surcharge and health and education cess.

4. Capital Gains rates applicable to unit holders as per domestic provisions

Transaction	Short term capital gains(a)	Long term capital gains(a)(b)
Sale transactions of equity shares/ unit of an equity oriented fund which attract STT	15%	10%*
Sale transaction other than mentioned above:		
Individuals (resident and non-residents)	Progressive slab rates	20% / 10% ^(b)
Firms	30%	
Resident companies	30%/25% ^(d) /22%/15% ^(f)	
Overseas financial organizations specified in section 115AB	40% (corporate) 30% (non corporate)	10%
FII's	30%	10%
Foreign companies other than ones mentioned above	40%	20% / 10% ^(c)
Local authority	30%	20% / 10%
Co-operative society rates	Progressive slab or 20% ^(g)	

* Income-tax at the rate of 10% to be levied on long-term capital gains exceeding Rs. 1 lakh (without indexation benefit and foreign exchange fluctuation)

- (a) These rates will further increase by applicable surcharge & health and education cess.
 (b) Income-tax rate of 20% with indexation and 10% without indexation.
 (c) Long term capital gains arising to a non-resident from transfer of unlisted securities or shares of a company, not being a company in which the public are substantially interested, subject to 10 per cent tax (without benefit of indexation and foreign currency fluctuation).
 (d) If total turnover or gross receipts in the financial year 2018-19 does not exceed Rs. 400 crores.
 (e) This lower rate is optional and subject to fulfillment of certain conditions as provided in section 115BAA.
 (f) This lower rate is optional for companies engaged in manufacturing business (set-up & registered on or after 1 October 2019) subject to fulfillment of certain conditions as provided in section 115BAB.
 (g) Co-operative societies have the option to be taxed at progressive slab rates or 20% subject to fulfillment of certain conditions as provided in section 115BAD.

5. Personal Income-tax Scenario

Individual	Total Income								
	475,000	825,000	1,000,000	1,200,000	1,500,000	5,650,000	11,150,000	21,150,000 #	51,150,000 #

Additional Tax burden/ (Savings) (%) in Option B	-	8.33%	(6.25%)	(8.00%)	(12.79%)	(1.88%)	(0.88%)	(0.45%)	(0.18%)

Resident senior citizen (age 80 years and above)	Total Income								
	475,000	825,000	1,000,000	1,200,000	1,500,000	5,650,000	11,150,000	21,150,000 #	51,150,000 #
Tax in FY 2021-22 (Option A)*	NIL***	36,400	72,800	119,600	213,200	1,658,800	3,707,600	7,930,000	21,514,480
Tax in FY 2021-22 (Option B)**	NIL***	50,700	78,000	119,600	195,000	1,638,780	3,686,670	7,907,250	21,489,546
Additional Tax burden/ (Savings) in Option B	-	14,300	5,200	-	(18,200)	(20,020)	(20,930)	(22,750)	(24,934)
Additional Tax burden/ (Savings) (%) in Option B	-	39.29%	7.14%	-	(8.54%)	(1.21%)	(0.56%)	(0.29%)	(0.12%)

* For purpose of tax calculation under Option A, ad hoc deduction of INR 150,000 has been claimed. The ad hoc deduction is only illustrative in nature. Basis actual deduction, the tax amount will vary.

** For purpose of tax calculation under Option B, no exemption/ deductions have been claimed.

*** NIL tax on account of rebate under section 87A.

If the said taxable income includes capital gains under section 111A and section 112A of the Act, then enhanced surcharge of 37% and 25% would not be applicable and accordingly effective tax rate would be lower.

Disclaimer: The information set out above is included for general information purposes only and does not constitute legal or tax advice. In view of the individual nature of the tax consequences, each investor is advised to consult his/her own tax consultant with respect to specific tax implications arising out of their participation in the Scheme. Income Tax benefits to the mutual fund & to unit holder is in accordance with the prevailing tax laws as certified by the mutual funds tax consultant. Any action taken by you based on the information contained herein is your responsibility alone. Mirae Asset Mutual Fund will not be liable in any manner for the consequences of such action taken by you. The information contained herein is not intended as an offer or solicitation for the purchase and sales of any schemes of Mirae Asset Mutual Fund.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

■ Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

■ Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

■ Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

■ Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

■ 4 Indexation Benefit:

- | Long Term Capital Gains (holding period of over 3 years) from Debt Mutual Funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- | Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- | The cost of acquisition for computation of tax is adjusted for inflation using CII, there by reducing the capital gains from tax perspective.
- | An investment made into a debt fund towards the end of a financial year (say, in March 2020) and held for a little over 3 years (say, in April 2023) would be eligible for application of CII over 5 financial years, resulting in 4 indexation benefit.

■ Total Expense Ratio:

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

■ Tracking Error:

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

■ Average Maturity:

Weighted average maturity of the securities in scheme.

■ Portfolio Yield (Yield To Maturity):

Weighted average yield of the securities in scheme portfolio.

■ Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

■ Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

■ Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

Key Features	Mirae Asset Large Cap Fund	Mirae Asset Emerging Bluechip Fund	Mirae Asset Tax Saver Fund	Mirae Asset Focused Fund
Type of Scheme	Large Cap Fund - An open ended equity scheme predominantly investing across large cap stocks	Large & Mid Cap Fund - An open ended equity scheme investing in both large cap and mid cap stocks	ELSS - An open ended equity linked saving scheme with a statutory lock in of 3 years and tax benefit	Focused Fund - An open ended equity scheme investing in a maximum of 30 stocks intending to focus in large cap, mid cap and small cap category (i.e., Multi-cap)

*Absolute Return (less than one year)

Past Performance may or may not be sustained in future.

§ For computation of since inception returns (%) the allotment NAV has been taken as ₹1000.00 for MACMF, MASF & MAOF and ₹10.00 for all other Schemes. In case, the start / end date of the concerned period is a non-business date (NBD), the NAV of the previous date is considered for computation of returns.

Returns (%) for less than 1 year calculated on simple annualized basis.

The calculations of returns shall assume reinvestment of all payouts at the then prevailing NAV. CAGR - Compounded Annualised Growth returns. NAV (per unit) is at the end of the period.

**Standard benchmark prescribed as per the applicable SEBI circular. For MASF the returns are for Regular Savings Plan - Growth Option. Returns for others scheme are provided for Regular Plan Growth Option. Load is not considered for computation of return.

Mirae Asset Nifty Financial Services ETF, Mirae Asset Money Market Fund Mirae Asset S&P 500 TOP 50 ETF, Mirae Asset S&P 500 TOP 50 ETF Fund of Fund, Mirae Asset Hang Seng TECH ETF and Mirae Asset Hang Seng TECH ETF Fund of Fund are in existence for less than 6 Month, as per SEBI regulation performance of the schemes has not been shown.

The performance of Mirae Asset Fixed Maturity Plan - Series III - 1122 days has not been provided since it is a closed ended scheme and performance is not comparable with other open ended schemes.

IDCW is gross IDCW. As per current Income Tax Rules, for financial year 2020-21 IDCW under equity scheme is tax free in the hands of investors, whereas for IDCW under Debt schemes applicable statutory levies, if any, needs to be adjusted by the AMC. The fiscal rules / tax laws are subject to change. For further details, please refer to the section titled "Taxation" in the Statement of Additional Information of Mirae Asset Mutual Fund. In view of the individual nature of tax consequences, each investor is advised to consult his / her professional tax advisor. For complete IDCW history details please refer to our website www.miraeassetmf.co.in

Statutory Details: Sponsor: Mirae Asset Global Investments Company Limited. Trustee: Mirae Asset Trustee Company Private Limited; Investment Manager: Mirae Asset Investment Managers (India) Private Limited.
