EQUITY UPDATE

- Nifty (+5.5%) zoomed in November 2023 as global market turned bullish anticipating Fed rate hike cycle behind clearly indicated by 15% rally in US 10yr yields. The results were also in-line with strong beat in autos, energy, industrials while IT and consumer were weak.
- The Mid-cap Index and Small-cap Index outperformed the Large-cap Index and were up 10% and 12%, respectively. Sector-wise, all sectoral indices ended on a higher note; realty, oil & gas and healthcare gained 18%, 13% and 11% respectively.
- Globally, most markets closed in positive territory. Brazil, South Korea and Germany gained 12%, 11% and 10%.

Global Macros

- **Bond yield:** Fed in its November meeting kept the rates unchanged on the expected lines and noted that economic activity has been expanding at a "strong" pace and that job gains have "moderated". Fed also noted that they are likely nearer to the end of the hiking cycle which cheered the markets. Post Fed meeting the US 10y yield cooled to 4.3% after breaching 5% in late-Oct which led to risk-on rally in the global markets. De-escalation of war in middle-east added to risk-on sentiment with Oil down up 4.5% MoM on.
- **Crude:** Brent crude spot price fell to US\$80.60/bbl on November 30, 2023 from US\$88.51/bbl as on October 31, 2023 and future prices fell to US\$82.83/bbl as on November 30, 2023 from US\$87.41/bbl on October 31, 2023.

Domestic Macros

- **GDP Growth:** India's Gross Domestic Product (GDP) grew at a higher-than-expected 7.6% in the July to September 2023 quarter driven by manufacturing and construction sectors. While the manufacturing sector's gross value added (GVA) grew by 13.9 percent year-on-year in July-September, up from 4.7 percent in April-June, that of the construction sector rose by 13.3 percent, up from versus 7.9 percent in April-June. However, agricultural growth slowed down to 1.2 percent from 3.5 percent in April-June.
- **GST Collection:** GST revenue collection in October 2023 was at Rs 1.68 lakh crore, up by around 15% on an annual basis. With this, the monthly GST revenues has remained over Rs 1.4 lakh crore for 21 months in a row.
- **Credit Growth:** As per latest RBI data, system credit growth stood at 20.6% YoY (16.2% YoY excluding the impact of the HDFC-HDFC Bank merger) for the fortnight ended November 17, 2023
- **Inflation:** October 2023 Consumer Price Index inflation moderated in line with expectations to 4.9% (September: 5%).
- **Currency:** USD-INR has depreciated to Rs 83.30/US\$ (on November 30, 2023) from Rs 83.26/US\$ (on October 31, 2023). USD-INR fell to historic lows of Rs 83.40/US\$ intra-month before recovering.

Regulatory, policy and market developments

- **Equity trading trends:** *FPIs bought US\$1.2 bn (until November 30) of Indian equities in the secondary market, whereas DIIs bought US\$1.7 bn (until November 30).
- **State Elections:** Upcoming state elections will be closely tracked by markets to assess outcome of general elections in 2024.

2QFY24 Earnings Review: In-line quarter driven by BFSI and Autos

- Earnings for Nifty-50 posted a solid 28% growth. Ex-OMCs, Nifty's earnings grew 22% YoY. Ex-Metals & O&G, Nifty earnings were up 32%.
- The earnings growth was fueled by the domestic cyclicals, such as BFSI and Auto. BFSI clocked a 33% YoY growth, while Auto registered a growth of 112% YoY.
- OMC's (Oil Marketing Companies) profitability surged to INR266b in 2QFY24 vs. a loss of INR27b in 2QFY23 owing to strong marketing margins.

Key sectoral trends:

- **Technology:** The IT Services companies reported a weak performance (although in line) in 2QFY24 with a median revenue growth of 1.0% QoQ CC, in an otherwise seasonally strong quarter. Large IT cos have cut revenue guidance despite multi-year mega deal signings, which indicates a challenging 2HFY24 with elongated ramp-ups and higher furloughs in 3Q.
- **Banks:** Earnings growth has broadly stood in line, owing to steady loan growth and robust asset quality even as margins compressed further (more resilient for PSU banks so far). Asset quality has continued to improve while SMA and restructured pool have remained in control.

- **Automobiles:** 2QFY24 results have been promising, with most of the companies surpassing EBITDA and PAT estimates. The positive results were largely been driven by: 1) lower commodity costs, 2) better product mix, 3) favorable FX, and 4) operating leverage.
- **Consumer:** The overall FMCG sector posted muted YoY volume growth even as pricing growth component is moderating. Discretionary sector saw an impact in demand due to festive shift to 3Q.

Outlook

- **Markets heading towards seasonally strong period:** Indian economy, typically fairs better in 2H of financial year, given the multiple festive occasions. This year too, the seasonality should play out, in our view. Further, given the general elections next year, it will be busy on the newsflow front. As an investor, we continue to focus on the datapoints, which for now appears to be strong.
- **Macros remain strong**
 - Inflation cooled marginally in Oct'23 by -15 bps MoM to 4.87% back to sub 5% levels, as core inflation cools in October.
 - Bank credit growth was up 1.2ppt MoM to 15.9%YoY as of 3rd Nov'23.
 - Power consumption grew 23% YoY, fastest in 17-mths.
 - Railway freight traffic growth at 8% YoY was +2ppt MoM and at a 13mth high.
 - Demand for Indian auto companies during festive season seems strong. Registration in Festive period rose ~20% YoY 2Ws and 10% for PVs, CV's were ~8% YoY, but fell 0.4% YoY for tractors.
- **Construction cycle strong**
 - Steel consumption growth stayed strong at 15% YoY for Oct'23
 - Property registrations were strong in Mumbai (+26%), though declined in Delhi (-13% YoY). Housing starts are now trending near record levels with launches up ~25% YoY.
- **Rural soft**
 - Deficient monsoon rains are a concern for agriculture. Recovery in rural demand is gradual as indicated by FMCG companies. However, moderation in inflation will support consumption going forward.
- **India stands out positively, amidst global uncertainty:** While large part of the domestic economy has recovered post COVID, there are still some pockets of normalization remaining, which will sustain the overall economic recovery. Global call on interest rates continue to remain "higher for longer" for now and to that extent will have a bearing on the GDP growth. In this context, India clearly stands out with its GDP growth continues to remain ahead of the relevant peer economies. While, focus will shift to busy election calendar (state and general next year), underlying economic fundamentals appear strong supported by a) Cyclical upturn in many sectors (Real estate, Auto, Banking, Telecom etc), b) Manufacturing tailwinds led by China+1 & PLI, c) Capex recovery (India Inc. Balance Sheets have strengthened) and d) Consolidation (formalization). Over the medium term, we continue to remain constructive on equities and believe India is on the cusp of achieving robust growth over the next few years.
- **Key things to watch out are:** (a) Newsflow on Indian elections, (b) Oil price trend, (c) rate trajectory by the central banks and (c) Russia-Ukraine & Middle-East war impact on global supply chain.
- **Valuation and view:** Mid/small cap indices have outperformed the Nifty50 by 25-30% CYTD and could be due to strong flows in funds focused on mid/small caps (at a cyclical high). On the other hand large cap stocks have seen outflows (flows are at a cyclical low). As a result, Mid/Small cap stocks are trading at a significant premium to largecap. Nifty 50 is trading at reasonable valuation of ~19x on FY25 earnings with attractive earnings growth outlook. In this context, currently large cap focused funds appear well placed.
- **Recommendation:** Investors should invest based on their risk profile and continue allocating via SIPs. We prefer large-cap oriented funds and hence any fresh allocations can be made in diversified funds like largecap, Flexicap and Multicap. Hybrid funds can also be made part of core portfolio. In thematic funds, financial sector is trading at attractive valuations and hence can invest in BFSI fund.

DEBT UPDATE

Executive Summary

Fiscal risks have taken over "higher-for-longer" risks in the elevating bond yields around the world. Global economy shows signs of slowing down in the final quarter of the year 2023 as manufacturing languishes and services sector seem to have reached its peak of post-pandemic expansion & labour market showing signs of weakening.

India continues to show resilience against the backdrop of a challenging global environment. This resilience is underpinned by solid manufacturing activity and government spending, outpacing a slowing global economy squeezed by elevated interest rates and higher bond yields.

Global Macros

The Federal Reserve kept the target range for the federal funds rate at its 22-year high of 5.25% - 5.5% for a second consecutive time in November 2023, reflecting policymakers' dual focus on returning inflation to the 2% target while avoiding excessive monetary tightening.

Although new estimates showed that the US GDP expanded by 5.2% in Q3 CY2023 (marking the sharpest growth rate since Q4 CY2021), US Treasuries yield registered a sharp correction in Nov-2023, declining to 4.3% from touching 5% in Oct-23 due to new softer data prints, soft consumption and dovish FOMC outcome. FOMC minutes indicated further tightening if inflation progress proved insufficient and financial conditions eased. US Treasuries remained range bound in a shortened week with FOMC Minutes largely factored in by markets.

Incoming data from the US was softer:

- Non-Farm Payrolls for Oct-2023 stood at 150k vs 297k for Sep-2023 (revised downwards from 336k)
- Unemployment Rate for Oct-2023 increased to 3.9% vs 3.8% in Sep-2023.
- PMI for Oct-2023 fell to 50.7 as against 51.0 for Sep-2023.
- ISM Services Index for Oct-2023 fell to 51.8 vs 53.6 for Sep-2023.

US CPI for Oct-2023 released weaker at 3.2% vs 3.7% for Sep-2023. Core inflation stood at 4%. Retail sales for Oct-2023 fell by lower at -0.1%. Personal income in the United States increased 0.2% month-over-month in October 2023, the least in four months. Personal consumption for Q3 CY2023 grew at 3.6%. PCE Deflator for Oct-2023 was softer at 3% vs 3.4% for Sep-2023.

BOE held policy rates stable at a 15-year high of 5.25% for the second time while remaining hawkish on the possibility of rate hikes given signs of an economic slowdown as well as the challenge to maintain inflation. UK GDP for Q3 CY2023 grew by 0.6% (same as Q2 CY2023). Household spending increased at a faster pace at 0.7% vs 0.2% in Q2 CY2023 while there was observed slowdown in public expenditure at 0.1% from 1.3% and business investment at 2.8% vs 9.2%. UK CPI for Oct-2023 fell to 4.6% vs 6.7% for Sep-2023. Core fell to 5.7% vs 6.1% for Sep-2023.

Eurozone GDP for Q3 CY2023 rose by 0.1% (same as Q2 CY2023). Eurozone CPI for Nov-2023 stood at 2.4% YoY, lowest since July 2021. Core stood at 3.6%. Eurozone unemployment for Oct-2023 ticked higher at 6.5% (same as Sep-2023).

Bank Of Japan (BOJ) retained policy rates while tweaking around its YCC. BOJ will now regard a loose upper bound of 1% for 10-year Japan Government Bond (JGB) yields as a reference in its market operations. 10Y JGBs yields inched higher as a result. The Japanese economy shrank 0.5% QoQ in Q3 CY2023 vs 1.1% growth in Q2 CY2023 amid elevated cost pressure and global headwinds. Private consumption, capital expenditure and public investments were sluggish. Japanese CPI for Oct-2023 rose by 3.3% vs 3% for Sep-2023. Core fell to 4% vs 4.2% for Sep-2023.

The Australian central bank raised the policy rates by 25 bps to a 12 year high of 4.35%. Although the central bank resumed rate increases after a gap of four months, it refrained from committing to further rate hikes and indicated a data dependent approach for future policy action. Australia CPI declined to 4.9% in Oct-2023.

Bank of China left its key policy rates unchanged in line with consensus expectations. Chinese CPI for Oct-2023 fell to -0.2% vs 0.0% for the month prior. China's trade surplus in Oct-2023 narrowed sharply to USD 56.53 billion from USD 82.35 billion in Oct-22. Exports fell more than expected due to persistent weak demand from abroad while imports unexpectedly grew.

Reserve Bank of New Zealand, Bank of Korea and Bank of Thailand maintained status quo on policy rates in line with consensus expectations.

Gold prices reached at an all-time high due to dovish FOMC statements, weaker dollar and lower real rates. Brent Crude prices fell to USD 78 per barrel from USD 81 per barrel for the week prior amidst uncertainty over OPEC+ voluntary output cuts and growing concerns about global oil demand due to weaker than expected manufacturing activity in the US and softer energy demand by two of the largest energy consumer – US and China.

Domestic Macros

India's Real GDP growth came at 7.6% in Q2 FY24 v/s 7.8% in Q1 FY24 (YoY). The Q2 FY24 growth is due to cyclical factors like robust corporate profits and a strong government spending in a pre-election year. Growth was again led by investments and government expenditure, while private consumption continued to struggle in Q2 FY24.

CPI in India fell to 4.87% in Oct-2023, the lowest in four months, compared to 5.02% in Sep-2023.

Foreign Institutional Investors (FII) became net buyers at ₹24,546 crs. after 2 months of outflow. RBI has successfully built up forex reserves to weather any crisis and ensure to protect the Indian Rupee amidst global instability.

Increase in Forex reserves to protect the Indian rupee amidst global instability. The fiscal position remains under control with twin deficits – current account deficit and fiscal deficit, mainly due to increase in public investments to support growth.

Debt Outlook

Reserve Bank of India (RBI) in the last Monetary Policy Committee (MPC) meeting chose to keep the policy rates unchanged and emphasized on a possible need for Open Markets Operation (OMO) sales. However, during the month, pressure to carry out OMO sales have come down significantly because domestic liquidity conditions have narrowed due to festive season and direct tax collections.

Benchmark yields have held their ground and stuck between 7.2 – 7.3% during the period with continued FII flows.

How to read a Mutual Fund Factsheet?

Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

Five things to look out for in mutual fund factsheets

Basic information

The factsheet provides all the general information on the funds its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight funds generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

Performance aspects

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

Fund manager details

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well.

The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

Portfolio aspects

Key portfolio attributes to look for in equity/ hybrid funds

Asset allocation

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

The data used is for illustration purpose only.

Company and sector allocation

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to riskier sectors or low quality stocks.

Allocation - Top 10 Sectors

Key portfolio attributes to look for in debt funds

Credit quality profile

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

The data used is for illustration purpose only.

Instrument break-up

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short-term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

Tax Reckoner

Snapshot of Income Tax rates specific to Mutual Funds

The Income Tax rates are applicable to financial year 2023-24 as per Finance Act, 2023
Income-tax implications on income with respect to units of Mutual Fund

Type of Investor	Resident***	NRI
Withholding tax rate	10%*	20%** or rate as per applicable tax treaty*** (whichever is lower)

* Tax not deductible if income in respect of units of a mutual fund is below Rs. 5,000 in a financial year.

** The base tax is to be further increased by surcharge at the rate of:

- 37% on base tax where income or aggregate of such income exceeds Rs. 5 crore;
- 25% where specified income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where income or aggregate of such income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case investor is opting for 'New Regime' as mentioned on page 2, the rate of surcharge not to exceed 25%.

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge.

*** The income distributed by mutual fund to unitholders is unlikely to fall within the definition of dividend under the tax treaty. Given this and the language of the newly inserted provision to section 196A, claiming tax treaty benefit in respect of income distributed by mutual fund to unitholders for withholding tax purpose may not be possible.

**** As per section 139AA of the Income tax Act, 1961 ("the Act") read with rule 114AAA of the Income-tax Rules, 1962, in the case of a resident person, whose PAN has become inoperative due to PAN -Aadhaar not being linked on or before 30 June 2023, it shall be deemed that he has not furnished the PAN and tax could be withheld at a higher rate of 20% as per section 206AA of the Act. For linking PAN with Aadhaar after 30 June 2022, fees of Rs 1,000 thereafter has been prescribed.

Specified mutual fund schemes - Note 1		30% [^]	Not applicable

Note 1 - Capital gains from transfer of units of "specified mutual fund schemes" acquired on or after 1st April 2023 are treated as short term capital gains taxable at applicable slab rates as provided above irrespective of the period of holding of such mutual fund unit. For this purpose, "specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

Note 2 - For "Fund of Fund investing in Domestic Equity ETFs", following provisions of Income Tax Act 1961, may be applicable on this scheme. As per the Section 112A of the Act, this scheme (which invest at least 90% in domestic equity ETF, where such ETF invest at least 90% in domestic equity shares) falls under the category of "equity oriented fund", however, as per the newly introduced Section 50AA by Finance Act, 2023, any "specified mutual fund", by whatever name called, where not more than 35 percent of its total proceeds is invested in the equity shares of domestic companies, any gains on transfer / redemption of units of such specified mutual funds acquired on or after 1 April 2023 shall be deemed to be short-term capital gains. A view may be adopted that sale of this scheme may be classified as "specified mutual fund" under the Act and should be taxable at the rate of 15% (plus applicable surcharge and cess). For further details, clarification and action, please consult your tax advisor.

* Income-tax at the rate of 10% (without indexation benefit and foreign exchange fluctuation) to be levied on long-term capital gains exceeding Rs. 1 lakh provided transfer of such units is subject to Securities Transaction Tax (STT).

§ Surcharge to be levied at:

- 37% on base tax where specified income*** exceeds Rs. 5 crore;
- 25% where specified income** exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case total income includes income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes, the rate of surcharge on the said type of income not to exceed 15%. In case investor is opting for 'New Regime' as mentioned on page 3, the rate of surcharge not to exceed 25%.

*** Specified income - Total income excluding income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes. Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10 percent to be levied on base tax for the companies opting for lower rate of tax of 22%/15%. Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

Short term/ long term capital gain tax (along with applicable Surcharge and Health and Education Cess) will be deducted at the time of redemption of units in case of NRI investors. Tax treaty benefit can be claimed for withholding tax on capitals gains subject to fulfillment of stipulated conditions.

& After providing indexation.

*** Without indexation.

^ Assuming the investor falls into highest tax bracket.

^^ If total turnover or gross receipts in the financial year 2021-22 does not exceed Rs. 400 crores.

^^^ This lower rate is optional and subject to fulfillment of certain conditions as provided in section 115BAA.

^^^^ This lower rate is optional for companies engaged in manufacturing business (set-up & registered on or after 1 October 2019) subject to fulfillment of certain conditions as provided in section 115BAB.

- Further, the domestic companies are subject to minimum alternate tax (except for those who opt for lower rate of tax of 22%/15%) not specified in above tax rates.
- Transfer of units upon consolidation of mutual fund schemes of two or more schemes of equity oriented fund or two or more schemes of a fund other than equity oriented fund in accordance with SEBI (Mutual Funds) Regulations, 1996 is exempt from capital gains.
- Transfer of units upon consolidation of plans within mutual fund schemes in accordance with SEBI (Mutual Funds) Regulations, 1996 is exempt from capital gains.
- Relaxation to non-residents from deduction of tax at higher rate (except income distributed by mutual fund) in the absence of PAN subject to them providing specified information and documents.
- Tax to be deducted at twice the applicable rate in case of payments to specified person (except non-resident not having permanent establishment in India or person who is not required to furnish the return of income as notified by the Central Government) who has not furnished the return of income for the assessment year relevant to previous year immediately preceding the financial year in which tax is required to be deducted:
 - For which time limit for filing return has expired; and
 - The aggregate of tax deducted at source in his case is Rs. 50,000 or more in the said previous year.
- Additionally, if provisions of section 206AA are also applicable then tax to be deducted at higher of the two rates provided i.e. rate as per section 206AB or section 206AA.

Bonus Stripping: The loss due to sale of original units in the schemes, where bonus units are issued, will not be available for set off; if original units are: (A) bought within three months prior to the record date fixed for allotment of bonus units; and (B) sold within nine months after the record date fixed for allotment of bonus units. However, the amount of loss so ignored shall be deemed to be the cost of purchase or acquisition of such unsold bonus units.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

■ Average Maturity:

Average Maturity of the securities in scheme.

■ Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

■ Indexation Benefit:

- Long Term Capital Gains (holding period of over 3 years) from other than equity oriented and specified mutual funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- The cost of acquisition for computation of tax is adjusted for inflation using CII, thereby reducing the capital gains from tax perspective.

■ Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

■ Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

■ Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

■ Portfolio Yield (Annualized Portfolio YTM*):

Weighted average yield of the securities in scheme portfolio. *In case of semi annual YTM, it will be annualized.

■ Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

■ Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

■ Specified Mutual Fund:

Specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

■ Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

■ Total Expense Ratio:

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

■ Tracking Error:

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

\$ For computation of since inception returns (%) the allotment NAV has been taken as ₹1000.00 for MACMF, MASF MAOF, & MAMMF and ₹10.00 for all other Schemes. In case, the start / end date of the concerned period is a non-business date (NBD), the NAV of the previous date is considered for computation of returns.

Returns (%) for less than 1 year calculated on simple annualized basis. The calculations of returns shall assume reinvestment of all payouts at the then prevailing NAV.

CAGR - Compounded Annualised Growth returns. NAV (per unit) is at the end of the period.

**Standard benchmark prescribed as per the applicable SEBI circular.

For MASF the returns are for Regular Savings Plan - Growth Option. Returns for others scheme are provided for Regular Plan Growth Option. Load is not considered for computation of return.
