Tracking Error |

| | Tracking error could be the result of a variety of factors including but not limited |
|---------------------|--|
| | to: |
| | • Delay in the purchase or non- availability of securities which are part of the Index |
| | Due to timing of transactions either on RFQ platforms or in open market Due to investment in out of index investments such as Government securities, Repo in Government securities and TREPs |
| | • Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme. |
| | • Change in asset allocation between the Index and the Scheme in the last year of the Scheme. |
| | • Difference in valuation of underlying securities by the Index Provider and AMC's valuation providers. |
| | • Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise |
| | Fees and expenses of the Scheme. The Scheme has to invest in the securities in whole numbers and has to |
| | round off the quantity of securities.Interest/Payout of Income Distribution cum capital withdrawal Option. |
| | • Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the |
| | Scheme. |
| | While the intent of the scheme is to track the performance of the underlying index by investing in the securities forming part of the index, due to issues pertaining to liquidity of the debt market in India, the SEBI has prescribed guidelines within which the passive scheme may manage the allocation in the securities which may or may not form part of the index, with same or different weightages, in order to decrease the risk replication of the underlying index within the allowed range. This will result in fund portfolio different from the index portfolio with difference in the performance and volatility of the scheme. |
