Rebalancing due to passive breach

In accordance with Clause 3.5.3.11 and 3.6.7 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 in case of change in constituents of the index due to periodic review, the portfolio of the Scheme shall be rebalanced within 7 days. Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time

In the event of involuntary corporate action, the Scheme shall dispose the security not forming part of the underlying index within 7 Days from the date of allotment/listing.

Rebalancing of deviation due to short term defensive consideration

The Scheme, in general, will hold all the securities that constitute the underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances such tracking error is not expected to exceed 2% p.a for daily 12 month rolling return. However, in case of events like, dividend received from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the Scheme is an exchange traded fund, it will endeavor that at no point of time the Scheme will deviate from the index.

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. As per Clause 1.14.1.2 of SEBI Master Circular dated May 19, 2023, such changes in the investment pattern will be for short term and for defensive consideration only.

The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 7 Days, justification for the same including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Schemes.

Investment Strategy

Investments made from the net assets of the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. The AMC will strive to achieve the investment objective by way of a judicious portfolio mix comprising Gold (includes physical Gold and other Gold related instruments which may be permitted by Regulator from time to time) and instruments related to gold (including derivatives as and when permitted by SEBI), Debt Securities and Money Market Instruments. Investments in gold (includes physical Gold and other Gold related instruments which may be permitted by Regulator from time to time) would be primarily assessed with regard to its fineness. The AMC will endeavor to address the key risks associated with investments in Gold Bullion as under:

1. Quality and Purity Risk

- Physical Gold purchased by the Scheme will be of fineness (or purity) of 995 parts per 1,000 (99.9%) or higher.
- Custodian will accept physical gold only if the gold is compliance with the Good Delivery norms as specified by LBMA.

2. Passive Investments

The Scheme is a passively managed fund that shall be investing substantial portion of its assets in physical gold and tracking its performance as close as possible to the price of gold. Therefore, irrespective of decline / rise in prices of physical gold, The Scheme shall remain invested in gold and being a passively managed fund, no active calls based on outlook of gold prices will be taken by the Fund.

3. Custody risk

There is a risk that part or all of the physical gold belonging to the Scheme could be lost. damaged or stolen. In order to ensure safety, the said gold will be stored with custodian in its vaults. Gold held by custodian is also insured.

4. Tracking Error

Tracking error means the variance between daily returns of the underlying benchmark (gold in this case) and the NAV of the Scheme for any given period. NAV of the Scheme is dependent on valuation of gold. Gold has to be

valued based on the formula prescribed by SEBI. NAV so computed may vary from the price of Gold in the domestic market.

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or sale of gold due to -
 - > Illiquidity of gold,
 - > Delay in realization of sale proceeds,
 - > Creating a lot size to buy the required amount of gold
- The Scheme may buy or sell the gold at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
- Execution of large buy / sell orders
- Transaction cost (including taxes and insurance premium) and recurring expenses
- Realization of Unit holders' funds

Tracking error due to movement in prices of physical gold will impact the performance of the Scheme. However, the Scheme will endeavor to keep tracking error as low as possible by:

- Use of gold related derivative instruments, as and when allowed by SEBI Regulations
- Rebalancing of the portfolio.
- Setting off of incremental subscriptions against redemptions.

The tracking error i.e. the annualised standard deviation of the difference in daily returns between physical gold and the NAV of Gold ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMC, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. The same shall be disclosed on a daily basis on the websites of AMC and AMFI.

Along with the disclosure of tracking error, Gold ETF schemes shall also disclose the tracking difference i.e. the difference of returns between physical gold and the Gold ETF, on the website of the AMC on monthly basis for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units. **Numerical illustration on Exchange Traded Commodity Derivatives** (ETCDs):

Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Hang Seng TECH Index. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme
