Investment Strategy

The Scheme shall be constructed and actively managed according to the investment objective. The Scheme seeks to generate returns through investments in a range of debt and money market instruments with Macaulay duration of the portfolio between 1 year to 3 years. The fund will be managed according to the investment objective, thereby seeking to generate reasonable returns commensurate with low risk.

The Scheme may also invest in securities issued by corporate (both private sector and public sectors) including banks and financial institutions and Money Market Instruments across maturities / yield curve and ratings. The fund may also invest in government securities across maturities / yield curve. The fund may also look for opportunities from credit spreads among the range of available debt & money market instruments. The investment strategy of this scheme aims to optimize risk adjusted returns. The Scheme has a short term duration investment option that provides the flexibility to respond to continuously changing market scenario by managing its portfolio in line with current yield curve.

- The credit quality of the portfolio will be maintained and monitored using inhouse research capabilities as well as inputs from external sources such as independent credit rating agencies.
- The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security / instrument selection.
- The bottom up approach will assess the quality of security / instrument (including the financial health of the issuer) as well as the liquidity of the security.
- Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification techniques.

The Scheme does not propose to underwrite issuances of securities of other issuers.

The Scheme shall not invest in unrated debt instruments and derivatives. The Scheme shall not advance any loans. The Scheme does not invest in overseas/foreign securities. The scheme does not intend to participate in Stock Lending. The Scheme shall not participate in short lending, credit default swaps and Securities Lending & Borrowing.

The **Macaulay duration** is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Macaulay duration can be calculated:

Where:

t = respective time period

C = periodic coupon payment

y = periodic yield

n = total number of periods

M = maturity value

P = market price of bond

Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification. The Scheme shall aim to generate better returns than bank fixed deposits and government securities and may follow an accrual based strategy. The Scheme shall be based on Accrual strategy.

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Quantis as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and "soft" warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same so as to act in a preventive manner.

The risk control measures for managing the debt portion of the scheme are:

- 1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark.
- 2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed.
- 3. Interest rate risk is a function of the maturity profile or the tenure of the security in the portfolio. This is proactively monitored by managing average maturity in line with our view on the market.
- 4. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk.

5. We have different maturity buckets for corporate bonds. By being in different maturity buckets, we avoid concentration of the portfolio in a maturity bucket. We define individual limits for G Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons.

Policy for Investment decisions

The investment policy of the AMC has been determined by the Investment Committee ("IC") which has been ratified by the Boards of the AMC and Trustee. At the strategic level, the broad investment philosophy of the AMC and the authorized exposure limits are spelt out in the Investment Policy of the AMC. During trading hours, the Fund Managers have the discretion to take investment decisions for the Scheme within the limits defined in the Investment Policy, these decisions and the reasons thereof are communicated to the CEO for post facto approval.

The designated Fund Manager(s) of the Scheme will be responsible for taking day-to-day investment decisions and will inter-alia be responsible for asset allocation, security selection and timing of investment decisions.
