Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading</p>

Rebalancing due to passive breach

In accordance with Clause 3.5.3.11 and 3.6.7 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 in case of change in constituents of the index due to periodic review, the portfolio of the Scheme shall be rebalanced within 7 days. Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time

	<p>In the event of involuntary corporate action, the Scheme shall dispose the security not forming part of the underlying index within 7 Days from the date of allotment/ listing.</p> <p>Rebalancing of deviation due to short term defensive consideration</p> <p>Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. As per Clause 1.14.1.2 of SEBI Master Circular dated May 19, 2023, such changes in the investment pattern will be for short term and for defensive consideration only.</p> <p>The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 7 Days, justification for the same including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Schemes.</p> <p>Tracking Error</p> <p>The Scheme, in general, will hold all the securities that constitute the underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances such tracking error is not expected to exceed 2% p.a for daily 12 month rolling return. However, in case of events like, dividend received from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the Scheme is an exchange traded fund, it will endeavor that at no point of time the Scheme will deviate from the index.</p>
<p>Investment Strategy</p>	<p>The Mirae Asset Nifty Bank ETF will be managed passively with investments in stocks in the same proportion as in the Nifty Bank Index.</p> <p>The investment strategy of the Scheme will be to invest in a basket of securities forming part of Nifty Bank Index in similar weight proportion.</p> <p>The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, considering the change in weights of stocks in the Index as well as the incremental collections/redemptions in the Scheme. A part of the funds may be invested in debt and money market instruments, to meet the liquidity requirements.</p> <p>Subject to the Regulations and the applicable guidelines the Scheme may invest in the schemes of Mutual Funds. The investment strategy shall be in line with the</p>

asset allocation mentioned under “Section II (c): How will the Scheme allocate its assets”.

Though every endeavour will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

RISK CONTROL

The scheme aims to track the Nifty Midcap150 Index (before expenses) as closely as possible. The index is tracked on a regular basis and changes to the constituent’s or their weights, if any, are replicated in the underlying portfolio with the purpose of minimizing tracking error.

ETF being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions. The fund manager would endeavor to keep cash levels at the minimal to control tracking error.

Investment in Derivatives:

The Scheme may take derivatives position based on the opportunities available subject to the guidelines provided by SEBI from time to time and in line with the overall investment objective of the Scheme. Derivatives can be traded over the exchange or can be structured between two counter-parties. Those transacted over the exchange are called Exchange Traded derivatives whereas the other category is referred to as OTC (Over the Counter) derivatives.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

Policy for Investment decisions

At the strategic level, the broad investment philosophy of the AMC and the authorized exposure limits are spelt out in the Investment Policy of the AMC. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty Bank Index. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme</p>
