MARKET OUTLOOK^

- India's medium to long-term outlook remains strong, driven by robust macro fundamentals, fiscal discipline, and favorable demographics, with low household debt and decreasing debt-to-GDP.
- Equities are attractive for medium-term investments, though valuations require a selective approach, with earnings growth as a key driver.
- Banking & Financial Services, manufacturing, and consumption sectors are well-positioned for growth.
- Key risks include US trade policy, central bank rate changes, oil prices, geopolitical tensions, and private capex recovery.
- Investors should maintain disciplined asset allocation and consider Systematic Investment Plan (SIP) and Systematic Transfer Plan (STP) strategies for long-term equity exposure, alongside hybrid and thematic funds.

Past Performance may or may not be sustained in future.

Note: For computation of since inception returns (%) the allotment NAV has been taken as ₹ 10.00.
