Part II. INFORMATION ABOUT THE SCHEME

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation will be as follows:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Indian Equities and Equity Related Securities of companies that are likely to benefit either directly or indirectly from consumption led demand*	80	100
Money market instruments / debt securities Instruments and/or units of debt/liquid schemes of domestic/international Mutual Funds.	0	20

*Equity and Equity related instruments include convertible debentures, equity warrants, convertible preference shares, equity derivatives etc.

The Indian equities & equity related securities of companies include those securities listed on stock exchanges in India and includes ADRs & GDRs.

The Scheme will not invest in securitized debt and short selling. The scheme can invest upto 50% of Net Assets of Scheme into equity derivatives instruments for the purpose of trading, hedging and portfolio rebalancing. The Scheme may invest in derivatives upto 50% of the net assets of the Scheme for non-hedging purposes.

The Fund may also invest the residual portion of the portfolio in Money market instruments / debt securities Instruments and/or units of debt/liquid schemes of domestic/international Mutual Funds.

However, the cumulative gross exposure to gross derivatives, debt instruments, money market instruments and equity will not exceed 100% of the net assets of the scheme.

Investments in foreign securities shall be within the permissible securities mentioned under pursuant to Clause 12.19 of SEBI Master Circular dated June 27, 2024.

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities having residual maturity of less than 91 days.

Indicative Table (Actual instrument/percentages may vary subject to applicable SEBI circulars)

Sl. no	Type of Instrument	Percentage of exposure	Circular references*
1.	Equity Derivatives	Upto 50% of the net assets of the Scheme	Clause 12.25 of SEBI Master Circular dated June 27, 2024
2.	Equity Derivatives for non-hedging purposes	Upto 50%	--

3.	Securitized Debt	0%	Clause 12.15 of SEBI Master Circular dated June 27, 2024
4.	Overseas Securities	up to 25% of the net assets of the Scheme, subject to the approval from the Securities and Exchange Board of India and a maximum of US\$ 1 Billion per Mutual Fund	Clause 12.19 of SEBI Master Circular dated June 27, 2024

*SEBI circular references (wherever applicable) in support of exposure limits of different types of asset classes in asset allocation shall be provided.

Change in asset allocation:

In the event of deviation from mandated asset allocation mentioned above due to passive breaches, the rebalancing will be carried out in 30 business days. Where the portfolio is not rebalanced within 30 business days, justification for the same including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period in accordance with clause 2.9 of SEBI Master Circular dated June 27, 2024. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced;
- ii. not to levy exit load, if any, on the investors exiting such scheme

Rebalancing of deviation due to short term defensive consideration

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. As per clause 1.14.1.2 of SEBI Master Circular dated June 27, 2024 such changes in the investment pattern will be for short term and for defensive consideration only. In the event of deviations, portfolio rebalancing will be carried out within 30 Calendar days in such cases.

Overseas Investments by the Scheme:

According to paragraph 12.19 of SEBI Master Circular for Mutual Funds dated June 27, 2024, mutual funds can invest in certain permissible foreign securities.

As per paragraph 12.19.1 of SEBI Master Circular for Mutual Funds dated June 27, 2024, overseas investments are subject to an overall limit of US\$ 7 billion for all mutual funds put together. The Mutual Funds have been allowed an individual limit of US\$ 1 billion for overseas investments. The Scheme may, with the approval of SEBI/ RBI invest in foreign securities as specified by SEBI. The overall ceiling for investment in overseas ETFs that invest in securities is US \$ 1 billion subject to a maximum of US \$ 300 million per mutual fund.

The Scheme intends to invest upto USD 50 million in overseas securities, subject to maximum limits as specified in per paragraph 12.19 of SEBI Master Circular for Mutual Funds dated June 27, 2024. The said limit shall be valid for a period of six months from the date of closure of NFO. Thereafter the unutilized limit, if any, will not be available to the Scheme for investment in overseas securities and will be available towards the unutilized industry wide limits. Further investments in overseas securities will follow the norms for ongoing schemes. On an ongoing basis, the AMC is allowed to invest in overseas securities upto 20% of the average Asset Under Management ('AUM') in overseas securities of the previous three calendar months subject to maximum limit of USD 1 billion per Mutual Fund.

The above limits shall be considered as soft limits for the purpose of reporting only by Mutual Funds on monthly basis as per paragraph 12.19.1.3(d) of SEBI Master Circular for Mutual Funds dated June 27, 2024.

The Mutual Fund may, where necessary will appoint intermediaries as sub-managers, sub-custodians, etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses.

Suspension of Purchase of Units and Right to limit redemption of Units:

Subject to the approval of the Boards of the AMC and of the Trustee, and subject also to necessary communication of the same to SEBI, the determination of the NAV of the Units of the Scheme, and consequently of the Purchase and/or switching of Units, may be temporarily suspended in certain cases.

SEBI vide its clause 1.12 of SEBI Master Circular dated June 27, 2024 has laid down certain requirements to be observed before imposing restriction on redemptions.

B. WHERE WILL THE SCHEME INVEST?

1. Investment in Indian Equity securities
2. Investment in Debt Securities
3. Investment in Derivatives
4. Overseas Securities
5. Any other instruments, as may be permitted by RBI / SEBI / such other Regulatory Authority, from time to time, subject to Regulatory approvals

Detailed definition and applicable regulations/guidelines for each instrument shall be included in Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Consumer Investment Theme responds to lasting changes in the emerging and developed markets. The AMC's strong conviction in long-term opportunities of the consumer theme in India especially has led to develop Mirae Asset Great Consumer Fund. Mirae Asset Great Consumer Fund aims to capture the wide-ranging investment opportunities presented by this trend. It does not focus solely on the consumer sector but on a broad range of sectors that will benefit from increased consumption. The portfolio manager aims to construct a concentrated portfolio of stocks based on high conviction investment ideas. The fund manager may not have any bias towards particular market cap or style in selecting investment opportunities.

Investment in Derivatives:

The Scheme may take derivatives position based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the Scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy as permitted under the SEBI Regulations

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

Debt:

The Scheme will also invest in debt securities and money market instruments.

- The credit quality of the portfolio will be maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies.
- The investment team will primarily use a top down approach for taking interest rate view, sector allocation along with a bottom up approach for security/instrument selection.
- The bottom up approach will assess the quality of security/instrument (including the financial health of the issuer) as well as the liquidity of the security.
- Investments in debt instruments carry various risks such as interest rate risk, reinvestment risk, credit risk and liquidity risk etc. Whilst such risks cannot be eliminated, they may be minimized through diversification.

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objective of the Scheme and provisions of SEBI (MF) Regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools like but not limited to calculating risk ratios, tracking error etc. The AMC has implemented Bloomberg as the Front Office and Settlement System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for pre-emptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyses the same so as to act in a preventive manner.

The risk control measures for managing the debt portion of the scheme are:

1. Monitoring risk adjusted returns performance of the fund with respect to its peers and its benchmark.
2. Tracking analysis of the fund on various risk parameters undertaken by independent fund research / rating agencies or analysts and take corrective measures if needed.

3. Credit analysis plays an important role at the time of purchase of bond and then at the time of regular performance analysis. Our internal research anchors the credit analysis. Sources for credit analysis include Capital Line, CRISIL, ICRA updates etc. Debt ratios, financials, cash flows are analysed at regular intervals to take a call on the credit risk.
4. We define individual limits for G-Sec, money market instruments, MIBOR linked debentures and corporate bonds exposure, for diversification reasons.

The Scheme does not propose to underwrite issuances of securities of other issuers.

Policy for Investment decisions

The investment policy of the AMC has been determined by the Investment Committee (“IC”) which has been ratified by the Boards of the AMC and Trustee. At the strategic level, the broad investment philosophy of the AMC and the authorized exposure limits are spelt out in the Investment Policy of the AMC. During trading hours, the Fund Managers have the discretion to take investment decisions for the Scheme within the limits defined in the Investment Policy, these decisions and the reasons thereof are communicated to the CEO for post facto approval.

The designated Fund Manager(s) of the Scheme will be responsible for taking day-to-day investment decisions and will inter-alia be responsible for asset allocation, security selection and timing of investment decisions.

Portfolio Turnover Policy

Portfolio turnover is defined as the aggregate value of purchases or sales as a percentage of the corpus of a scheme during a specified period of time. The Scheme is open ended, with subscriptions and redemptions expected on a daily basis, resulting in net inflow/outflow of funds, and on account of the various factors that affect portfolio turnover; it is difficult to give an estimate, with any reasonable amount of accuracy.

However, during volatile market conditions, the fund manager has the flexibility to churn the portfolio actively to optimize returns keeping in mind the cost associated with it.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

AMFI Tier 1 Benchmark (Total Returns Index): The performance of the scheme will be benchmarked to the performance of the **Nifty India Consumption Index (TRI)**.

Rationale for adoption of benchmark:

The Trustees have adopted Nifty India Consumption Index (TRI) as the benchmark index.

The above benchmark is in accordance with Clause 1.9 of SEBI Master Circular dated June 27, 2024 on ‘Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes’.

The same has been chosen as the benchmark as the asset allocation pattern of the benchmark is in conformity with the declared asset allocation pattern of the scheme in the Scheme Information Document.

The performances of the schemes of the Mutual Fund are reviewed by the Investment Committee (“IC”) as well as the Board of Directors of the AMC and Trustee periodically. The IC is operational at the AMC level and has majority representation from the senior management of the company. Monthly reports on the performance of the schemes with appropriate benchmark indices are also sent to the Directors of the AMC and Trustee and also with

the relative performance of the schemes of other mutual funds schemes in the same category which is placed with the Board of Directors of the AMC and Trustee. Further, in terms of clause 6.14 of SEBI Master Circular dated June 27, 2024 the performance of the schemes will be benchmarked against the performance of respective benchmarks. Since the scheme is managed with no bias towards any theme, sector, market cap or style, a suitable benchmark indexes have been chosen as the benchmark.

The performance of the Scheme compared to its benchmark index will be reviewed at every meeting of the Board of Directors of the AMC and Trustee and corrective action as proposed will be taken in case of unsatisfactory performance.

In terms of clause 1.8 of SEBI Master Circular dated June 27, 2024 the AMC and Trustee may change the benchmark index or select an additional benchmark index after recording adequate justification for carrying out such change. However, change of benchmark index and/or selecting additional benchmark indices would be done in complete compliance of the relevant guidelines of SEBI in this regard.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under the Options there under can be calculated as shown below:

(Market or Fair Value of Scheme's investments + Current assets including Accrued Income - Current Liabilities and provisions including accrued expenses)

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments + Current assets including Accrued Income - Current Liabilities and provisions including accrued expenses}}{\text{No. of Units outstanding under the Scheme/Option.}}$$

The NAV, the sale and repurchase prices of the Units will be calculated and announced at the close of each working day. The NAVs of the Scheme will be computed and units will be allotted upto 3 decimals.

Computation of NAV will be done after taking into account IDCW paid, if any, and the distribution tax thereon, if applicable. Therefore, once IDCW are distributed under the IDCW Option, the NAV of the Units under the IDCW Option would always remain lower than the NAV of the Units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Valuation of Foreign Exchange Currency:

On the Valuation Day, the securities issued outside India and listed on the stock exchanges outside India shall be valued at the closing price on the stock exchange at which it is listed or at the last available traded price. However, in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security.

Further, in case of extreme volatility in the international markets, the securities listed in those markets may be valued on a fair value basis. In case the closing prices of securities are not available within the above mentioned time frame, the AMC may use the last available traded price for the purpose of valuation.

On the Valuation Day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the exchange rate available on Bloomberg/Reuters/RBI or any other standard reference rate at the close of banking hours in India. The Trustees reserve the right to change the source for determining the exchange rate. The exchange gain/loss resulting from the aforesaid conversion shall be recognized as unrealized exchange gain/loss in the books of the Scheme on the day of valuation. Further, the exchange gain/loss resulting from the settlement of assets/liabilities denominated in foreign currency shall be recognized as realized exchange gain/loss in the books of the scheme on the settlement of such assets/liabilities.

Illustration on Computation of NAV:

If the net assets of the Scheme are Rs.10,65,44,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows:

$$10,65,44,345.34 / 1,00,00,000 = \text{Rs. } 10.654 \text{ p.u. (rounded off to three decimals)}$$

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

- **Ongoing Price for subscription (purchase)/ switch-in (from other schemes/ plans of the mutual fund) by investors. (This is the price you need to pay for purchase/ switch-in):**

The Sale Price for a valid purchase will be the Applicable NAV.

i.e. Sale Price = Applicable NAV

For a valid purchase request of Rs. 10,000 where the applicable NAV is Rs. 11.1234, the units allotted will be:

$$= \frac{10,000 \text{ (i.e. purchase amount)}}{11.1234 \text{ (i.e. applicable NAV)}}$$

$$= 899.006 \text{ units (rounded to three decimals)}$$

Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration.

- **Ongoing Price for redemption (sale)/ switch-outs (to other schemes/plans of the mutual fund) by investors. (This is the price you will receive for redemptions/ switch-outs):**

The Repurchase Price for a valid repurchase will be the applicable NAV reduced by any exit load (say 1%).
i.e. applicable NAV - (applicable NAV X applicable exit load).

For a valid repurchase request where the applicable NAV is Rs. 12.1234, the repurchase price will be:
= 12.1234 - (12.1234 X 1.00%)
= 12.1234 - 0.1212
= Rs. 12.0022

Therefore, for a repurchase of 899.006 units, the proceeds received by the investor will be -
= 899.006 (units) * 12.0022 (Repurchase price)

= Rs. 10,790.049 (rounded to three decimals)

Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. NFO expenses were borne by the AMC. No NFO expenses were charged to the Scheme.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 2.25% of the daily net assets of the Scheme will be charged to the scheme as expenses. As per the Regulations, the maximum recurring expenses including investment management and advisory fee that can be charged to the Scheme shall be subject to a percentage limit of daily net assets as in the table below:

First Rs. 500 crores	2.25%
Next Rs. 250 crores	2.00%
Next Rs. 1250crores	1.75%
Next Rs. 3000 crores	1.60%
Next Rs. 5000 crores	1.50%
on the next Rs. 40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs 5,000 crores of daily net assets or part thereof,
Balance of assets	1.05%

For the actual current expenses being charged, the investor should refer to the website of the mutual fund <https://www.miraassetmf.co.in/downloads/statutory-disclosure/total-expense-ratio>

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

\$ Additional expenses for gross new inflows from specified cities***	Upto 0.30%

*Other expenses: Any other expenses which are directly attributable to the Scheme, may be charged with approval of the Trustee within the overall limits as specified in the Regulations except those expenses which are specifically prohibited.

^ In terms of clause 10.1 of SEBI Master circular dated June 27, 2024, in case exit load is not levied / not applicable, the AMC shall not charge the said additional expenses.

For the actual current expenses being charged, the investor should refer to the website of the Mutual Fund.

**Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc. and no commission for distribution of Units will be paid / charged under Direct Plan. The TER of the Direct Plan will be lower to the extent of the abovementioned distribution expenses/ commission which is charged in the Regular Plan.

The purpose of the above table is to assist the investor in understanding the various costs & expenses that the investor in the Scheme will bear directly or indirectly. These estimates have been made in good faith as per the information available to the AMC and the above expenses (including investment management and advisory fees) are subject to inter-se change and may increase/decrease as per actual and/or any change in the Regulations, as amended from time to time.

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of the Asset Management Companies (AMC), its associate, sponsor, trustee or any other entity through any route.

All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan. The TER of the Direct Plan will be lower to the extent of the distribution expenses/commission which is charged in the Regular Plan and no commission for distribution of Units will be paid / charged under the Direct Plan.

In addition to the limits as specified in Regulation 52(6) of SEBI (Mutual Funds) Regulations 1996 [‘SEBI Regulations’] or the Total Recurring Expenses (Total Expense Limit) as specified above, the following costs or expenses may be charged to the scheme namely:-

a)*Additional expenses for gross new inflows from specified cities:**

(a) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by SEBI from time to time are at least -

- (i) 30 per cent of gross new inflows in the scheme, or;
- (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the Scheme shall be charged on proportionate basis.

Provided further that, expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the Scheme in case the said inflows are redeemed within a period of one year from the date of investment.

Currently, SEBI has specified that the above additional expenses may be charged for inflows from beyond ‘Top 30 cities.’ The top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on ‘AUM by Geography – Consolidated Data for Mutual Fund Industry’ as at the end of the previous financial year.

Provided further that, additional TER can be charged based on inflows only from retail investors from B30 cities in terms of clause 10.1 of SEBI Master Circular dated June 27, 2024 ‘Retail investors’ are defined as individual investors with an inflow of an amount upto Rs 2,00,000/- per transaction.

This sub clause (a) shall be applicable for inflows received during the NFO period.

*** Note: SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 and AMFI letter dated No. 35P/ MEM-COR/ 85/ 2022-23 dated March 02, 2023 has directed AMCs to keep B-30 incentive structure in abeyance with effect from March 01, 2023 till further notice.

b) GST payable on investment and advisory service fees (‘AMC fees’) charged by Mirae Asset Investment Managers (India) Private Limited (‘Mirae Asset AMC’);

Within the Total Expense Limit chargeable to the Scheme, following will be charged to the Scheme:

(a) GST on other than investment and advisory fees, if any, (including on brokerage and transaction costs on execution of trades) shall be borne by the Scheme;
 (b) Investor education and awareness initiative fees of at least 2 basis points on daily net assets of respective Scheme.

(c) Brokerage and transaction cost incurred for the purpose of execution shall be charged to the schemes (a) up to 12 bps and 5 bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage & transaction costs, over and above the said 12 bps and 5 bps for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

The current expense ratios will be updated on the AMC website <https://miraeassetmf.co.in/downloads/regulatory> at least 3 working days prior to the effective date of the change.

Further, the notice of change in base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A) (b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996) in comparison to previous base TER charged to the scheme will be communicated to investors of the scheme through notice via email or SMS at least three working days prior to effecting such change.

However, any decrease in TER due to decrease in applicable limits as prescribed in Regulation 52 (6) (i.e. due to increase in daily net assets of the scheme) would not require issuance of any prior notice to the investors. Further, such decrease in TER will be immediately communicated to investors of the scheme through email or SMS and uploaded on the AMC website.

The above change in the base TER in comparison to previous base TER charged to the scheme shall be intimated to the Board of Directors of AMC along with the rationale recorded in writing.

The changes in TER shall also be placed before the Trustees on quarterly basis along with rationale for such changes.

Illustration of impact of expense ratio on scheme's returns (by providing simple example)

Particulars		Regular Plan	Direct Plan
Opening NAV per unit	A	10.0000	10.0000
Gross Scheme Returns @ 8.75%	B	0.8750	0.8750
Expense Ratio @ 1.50 % p.a.	C = (A x 1.50%)	0.1500	0.1500
Distribution Expense Ratio @ 0.25 % p.a. *	D = (A x 0.25%)	0.0250	0.0000
Total Expenses	E = C + D	0.1750	0.1500
Closing NAV per unit	F = A + B - E	10.7000	10.7250
Net 1 Year Return	F/A - 1	7.00%	7.25%

*Distribution/Brokerage expense is not levied in direct plan.

The above calculation is provided to illustrate the impact of expenses on the scheme returns and should not be construed as indicative Expense Ratio, yield or return.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (<https://www.miraeassetmf.co.in/>) or may call at '1800 2090 777' or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Exit	<p><u>I. For investors who have opted for SWP under the plan:</u></p> <p>a) 15% of the units allotted (including Switch-in/STP - in) on or before completion of 365 days from the date of allotment of units: NIL.</p> <p>b) Any redemption in excess of such limits in the first 365 days from the date of allotment shall be subject to the following exit load: (Redemption of units would be done on First In First Out Basis (FIFO):</p> <ul style="list-style-type: none"> • If redeemed within 1 year (365 days) from the date of allotment: 1%. • If redeemed after 1 year (365 days) from the date of allotment: NIL. <p><u>II. Other Redemptions: For Investors who have not opted for SWP under the plan:</u></p> <p>a) For all other redemption(s) (including Switch out, STP out):</p> <p>b) If redeemed within 1 year (365 days) from the date of allotment: 1%. If redeemed after 1 year (365 days) from the date of allotment: NIL.</p>

For any change in exit load, AMC will issue an addendum and display it on the website/Investor Service Centres.

The Mutual Fund may charge the load within the stipulated limit of 5% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 95% of the NAV.

The Trustee reserves the right to modify/alter the load structure and may decide to charge an exit load on the Units with prospective effect, subject to the maximum limits as prescribed under the SEBI Regulations. At the time of changing the load structure, the AMC shall take the following steps:

- Arrangements shall be made to display the changes/modifications in the SID in the form of a notice in all the Mirae Asset ISCs' and distributors' offices.
- The notice-cum-addendum detailing the changes shall be attached to SIDs and Key Information Memoranda. The addendum will be circulated to all the distributors so that the same can be attached to all SIDs and Key Information Memoranda already in stock.
- The introduction of the exit load along with the details shall be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load.
- Any other measures which the mutual funds may feel necessary.

The AMC may change the load from time to time and in case of an exit/repurchase load this may be linked to the period of holding. It may be noted that any such change in the load structure shall be applicable on prospective

investment only. The exit load (net off GST, if any, payable in respect of the same) shall be credited to the Scheme of the Fund.

The distributors should disclose all the commissions (in the form of trail commission or any other mode) payable to them for the different competing schemes of various mutual funds from amongst which the scheme is being recommended to the investor.

Section II

I. Introduction

A. Definitions/interpretation

Please refer the definitions/interpretation as disclosed under:
<https://www.miraeassetmf.co.in/downloads/statutory-disclosure/other-disclosure/offer-documents-data>

B. Risk factors

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the scheme can go up or down depending on various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee the future performance of the Scheme.
- The Scheme does not in any manner indicate its quality or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1.00 lakh made by it towards setting up the Mirae Asset Mutual Fund.
- The present scheme is not a guaranteed or assured return scheme. In addition, the scheme does not guarantee or assure any Income distribution cum Capital Withdrawal (IDCW) and also does not guarantee or assure that it will make any IDCW distribution, though it has every intention to make the same in the distributions of Income Distribution cum Capital Withdrawal option. All IDCW distributions of Income Distribution cum Capital Withdrawal will be subjected to the investment performance of the Scheme.

Scheme Specific Risk Factors

1. The fund may invest in domestic/overseas mutual funds which invests in equities and equity related securities of companies. Hence, movements in Net Asset Value of the underlying schemes would impact the performance of Mirae Asset Great Consumer Fund.
2. The disclosures of portfolio for the Scheme will be limited to the particulars of the asset allocation like equity securities and money market securities where the Scheme has invested.

Country Party Risk:

As the equity related securities such as warrants could be subjected to counter party risk as these rank equally among themselves and with all other unsecured obligations of the issuer in case of liquidation of the issuer. Therefore, the value of the Fund's assets will, and may always, depend entirely on the credit risk of the issuer held by the Fund. In the event of liquidation or default of the issuer and that a replacement issuer cannot be appointed, dealing of the Units of the ETF may be suspended and the Fund may ultimately be terminated, in which case, the Fund may redeem all outstanding Units at the Net Asset Value which may differ from the trading price on the exchange which is affected by secondary market trading factors.

Risks Associated with Equity Investments:

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Settlement Risk

Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.

Regulatory Risk

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

Risk associated with Unlisted Securities

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The underlying scheme may choose to invest in unlisted domestic securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks Associated with Debt & Money Market Instruments

Interest Rate Risk / Price Risk

From the perspective of coupon rates, debt securities can be classified in two categories, i.e., Fixed coupon bearing securities and Floating coupon bearing securities. In Fixed coupon bearing securities, the coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the floating coupon bearing securities, on the other hand, the coupon rate changes – 'floats' – with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury bill.

Fixed income securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall

and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system and liquidity. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Reinvestment Risk

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing in the market may differ from the original coupon of the bond. Consequently, the proceeds from regular coupon and principal payments on due date may get invested at a lower rate.

Credit Risk

Credit Risk comprises three components.

- Default Risk

Securities carry a risk of repayment of principal or interest by the borrower. This is called as default risk. The default risk depends on micro economic factors such as financial soundness and ability of the borrower and macro-economic factors such as industry performance, competition, trade barriers etc.

- Downgrade Risk

It is the risk that credit rating agency downgrades the rating of an issuer based on earnings and cash flows generating capacity. The credit rating migration of issuance leads to increase in the credit spread and thus reduces the price of corporate bond.

- Spread Risk

Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread widens, the prices of the corporate bonds tend to fall and so could the NAV of the Debt Schemes. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV could fall.

Prepayment Risk

The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the scheme.

Liquidity Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio.

Risks associated with Foreign Securities

The risk of investing in foreign securities carries exchange rate risks related to depreciation of foreign currency and the country risks, in addition to the risks of securities in domestic securities.

The country risks would include events such as change in regulations or political circumstances like introduction of extraordinary exchange rate controls, restrictions on repatriation of capital due to exchange rate controls, bilateral political tensions leading to immobilization of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise. For further details please refer to section “Investments Limitations and Restrictions in Foreign Securities” in this Scheme Information Document.

Currency risk

The foreign securities are issued and traded in foreign currencies. As a result, their values may be affected by changes in exchange rates between foreign currencies and the Indian Rupee as well as between currencies of countries other than India. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries.

Risks Associated with Derivatives:

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional instruments. Such risks include mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount.

Derivative products are highly leveraged instruments that require investment techniques and risk analyses different from those associated with traditional securities such as shares or bonds. Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly.

The options buyer’s risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.

The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The loss can be unlimited as underlying asset can increase to any levels. The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price and the loss is limited to strike price.

Investments in futures face the same risk as the investments in the underlying securities. The extent of loss is the same as in the underlying securities. However, the risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.

The derivatives are also subject to liquidity risk as the securities in the cash markets. The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility in the values. For further details please refer to section “Investments Limitations and Restrictions in Derivatives” in this Scheme Information Document.

Risk associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

C. Risk mitigation strategies

Concentration Risk

The Scheme will try and mitigate this risk by investing in large number of companies so as to maintain optimum diversification and keep stock-specific concentration risk relatively low.

Liquidity Risk

As such the liquidity of stocks that the fund invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.

Risks Associated with equity / equity related instruments :

The scheme has a diversified portfolio to counter the volatility in the prices of individual stocks. Diversification in the portfolio reduces the impact of high fluctuations in daily individual stock prices on the portfolio.

Risk of investing in unlisted securities

As per SEBI guidelines, not more than 10% of the portfolio can be invested in unlisted securities. Rigorous due diligence is undertaken before any investments are made by the portfolio in unlisted securities, if any.

Risks Associated with Debt & Money Market Instruments

Credit Risk - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Risks Associated with Repo in Corporate Debt

1) Illiquidity Risk

The repo market for corporate debt securities is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. Therefore, to mitigate such risks, it has been stipulated that gross exposure

to Repo in corporate bonds would be limited to 10% of net assets of the concerned scheme. Further, the tenor of repo would be taken based on nature and unit holders' pattern of the scheme.

2) Counter-party risk

Credit risk would arise if the counter-party fails to repurchase the security as contracted or if counterparty fails to return the security or interest received on due date. To mitigate such risks, the schemes shall carry out repo transactions with only those counterparties, which has a credit rating of 'A1+' or 'AA and above'. In case of lending of funds as a repo buyer, minimum haircuts on the value of the collateral security have been stipulated, and we would receive the collateral security in the scheme's account before the money is lent to the counterparty. Overall, we would have a limited number of counter-parties, primarily comprising of Mutual Funds, Scheduled Commercial banks, Financial Institutions and Primary dealers. Similarly, in the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter-party may hurriedly dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Scheme. Thus, the Scheme may suffer losses in such cases. Sufficient funds flow management systems are in place to mitigate such risks.

3) Collateral Risk (as a repo buyer)

Collateral risks arise due to fall in the value of the security (change in credit rating and/or interest rates) against which the money has been lent under the repo arrangement. To mitigate such risks, we have stipulated the minimum credit rating of the issuer of collateral security.

('AA' for long-term instruments/A1+ for money market instruments), maximum duration of the collateral security (10 years) and minimum haircuts on the value of the security.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral."

The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.

Apart from the investment restrictions prescribed under SEBI (MF) Regulations, the Fund does not follow any internal norms vis-à-vis limiting exposure to a particular scrip or sector etc.

For the purpose of consideration of credit rating of exposure on repo transactions for various purposes including for Potential Risk Class (PRC) matrix, liquidity ratios, Risk-o-meter etc., the same shall be as that of the underlying securities, i.e., on a look through basis. For transactions where settlement is guaranteed by a Clearing Corporation, the exposure shall not be considered for the purpose of determination of investment limits for single issuer, group issuer and sector level limits.

Overview of Debt Markets in India

Indian fixed income market, one of the largest and most developed in South Asia, is well integrated with the global financial markets. Screen based order matching system developed by the Reserve Bank of India (RBI) for trading in government securities, straight through settlement system for the same, settlements guaranteed by the Clearing Corporation of India and innovative instruments like TREPS have contributed in reducing the settlement risk and increasing the confidence level of the market participants.

The RBI reviews the monetary policy six times a year giving the guidance to the market on direction of interest rate movement, liquidity and credit expansion. The central bank has been operating as an independent authority, formulating the policies to maintain price stability and adequate liquidity. Bonds are traded in dematerialized form. Credit rating agencies have been playing an important role in the market and are an important source of information to manage the credit risk.

Government (Central and State) is the largest issuer of debt in the market. Public sector enterprises, quasi government bodies and private sector companies are other issuers. Insurance companies, provident funds, banks, mutual funds, financial institutions, corporates and FPIs are major investors in the market. Government loans are available up to 40 years maturity. Variety of instruments available for investments including plain vanilla bonds, floating rate bonds, money market instruments, structured obligations and interest rate derivatives make it possible to manage the interest rate risk effectively.

Indicative levels of the instruments as on November 06, 2024 are as follows:

Instrument	Maturity	Tenure	Yield	Liquidity
TREPS / Repo	Short	Overnight	6.24	Very High
CP / CD / T Bills	Short	3 months CP*	7.54	High
		3 months CD	7.17	
		1 Year CP*	7.85	
		1 Year CD	7.55	
Central Government securities	Low to High	10 years	6.83	Medium

CPs and CDs shall carry a minimum haircut of 1.5% of market value.

Securities issued by a local authority shall carry a minimum haircut of 2% of market value. Additional haircut may be charged based on tenor and illiquidity of the security.

The above are minimum stipulated haircuts where the repo period is overnight or where the re-margining frequency (in case of longer tenor repos) is daily. In all other cases, Fund Manager may adopt appropriate higher haircuts.

For the purpose of consideration of credit rating of exposure on repo transactions for various purposes including for Potential Risk Class (PRC) matrix, liquidity ratios, Risk-o-meter etc., the same shall be as that of the underlying securities, i.e., on a look through basis. For transactions where settlement is guaranteed by a Clearing Corporation, the exposure shall not be considered for the purpose of determination of investment limits for single issuer, group issuer and sector level limits.

The Trustee may alter the above restrictions from time to time to the extent that changes in the Regulations may allow and as deemed fit in the general interest of the Unit Holders.

Apart from the investment restrictions prescribed under SEBI (MF) Regulations, the Fund does not follow any internal norms vis-a-vis limiting exposure to a particular scrip or sector etc.

E. Fundamental Attributes

Following are the Fundamental Attributes of the scheme, in terms of Clause 1.14 of SEBI Master Circular for Mutual Funds dated June 27, 2024:

(i) Type of a scheme

Open ended – thematic/sectoral

An open-ended equity scheme following consumption theme

(ii) Investment Objective:

The investment objective of the scheme is to generate long term capital appreciation by investing in a portfolio of companies/funds that are likely to benefit either directly or indirectly from consumption led demand in India. The Scheme does not guarantee or assure any returns.

There is no assurance that the investment objective of the Scheme will be achieved.

- **Main Objective** - Growth & Income
- **Investment pattern**

Asset allocation:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Indian Equities and Equity Related Securities of companies that are likely to benefit either directly or indirectly from consumption led demand*	80	100
Money market instruments / debt securities Instruments and/or units of debt/liquid schemes of domestic/international Mutual Funds.	0	20

*Equity and Equity related instruments include convertible debentures, equity warrants, convertible preference shares, equity derivatives etc.

Rebalancing of deviation due to short term defensive consideration

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. As per clause 1.14.1.2 of SEBI Master Circular dated June 27, 2024, such changes in the investment pattern will be for short term and for defensive consideration only. In the event of deviations, portfolio rebalancing will be carried out within 30 calendar days in such cases.

(iii) Terms of Issue

- **Listing:**

The Scheme being open ended, the Units are not proposed to be listed on any stock exchange and no transfer facility on the exchange is provided. However, the Trustee reserves the right to list the units as and when open-end Schemes are permitted to be listed under the Regulations, and if the Trustee considers it necessary in the interest of unit holders of the Scheme.

- **Redemption:**

The Unit Holder has the option to request for Redemption either in amount in rupees or in number of Units. In case the request for Redemption specifies both, i.e. amount in rupees as well the number of Units to be redeemed, then the latter will be considered as the redemption request and redemption will be processed accordingly. The minimum redemption amount shall be 'any amount' or 'any number of units' as requested by the investor at the time of redemption request. The Trustees have authorized the AMC to suo moto redeem such fractional balance units (less than 1 unit), on periodic basis across all schemes, as and when decided by the AMC. Units can be redeemed (sold back to the Fund) at the Redemption Price during the Ongoing Offer Period. If an investor has purchased Units of a Scheme on more than one Business Day the Units will be redeemed on a first-in-first-out basis. If multiple Purchases are made on the same day, the Purchase appearing earliest in the account statement will be redeemed first.

Redemption Price:

The Redemption Price of the Units is the price at which a Unit Holder can redeem Units of a scheme. It will be calculated as described below:

Redemption Price = Applicable NAV - (Applicable NAV x Exit Load*)

* Exit Load, whatever is applicable, will be charged.

Redemption Price will be calculated for up to three decimal places for the Scheme.

For example, if the Applicable NAV of a Scheme is Rs.10.5550, and it has a 2% Exit Load, the Redemption Price will be calculated as follows:

Redemption Price = 10.5550 - (10.5550 X 2.00%) i.e. 10.4550 - 0.2110 = 10.3440

If the Scheme has no Exit Load, the Redemption Price will be equal to the Applicable NAV.

The Securities Transaction Tax levied under the Income Tax Act, 1961, at the applicable rate on the amount of redemption will be reduced from the amount of redemption.

To illustrate:

If a Redemption of 4,900 units is sought by the Unit Holder at a Redemption Price of Rs. 10.3440 (as calculated above), the redemption amount is Rs. 50,685.60. Securities Transaction Tax (STT) for instance is 0.001%. This will be further reduced by the STT of Re. 0.50 (i.e. Rs. 50,685.60 x 0.001%), making the net redemption amount Rs. 50,685.10.

If a Redemption of Rs. 10,000 is sought by the Unit Holder at a Net Redemption Price of Rs. 10.3440 (as calculated above), which will give 966.744 Units; the effective redemption amount will be grossed up to Rs. 10,204.08 (i.e. $10,000 \div (1-2\%)$) and 966.744 units ($10,204.08 \div 10.555$) will be redeemed. This is to ensure that the Unit Holder receives the net amount of Rs. 10,000 as desired.

Investors may note that the Trustee has a right to modify the existing Load structure in any manner subject to a maximum as prescribed under the Regulations and with prospective effect only.

Please refer section – LOAD STRUCTURE.

Applicable NAV for Redemption / Switch-Out / Systematic Transfer Plan:

- In respect of valid Redemption applications accepted at a Designated Collection Centre up to 3 p.m. on a Business Day, the NAV of such day will be applicable.
- In respect of valid Redemption applications accepted at a Designated Collection Centre after 3 p.m. on a Business Day, the NAV of the next Business Day will be applicable.
- **Aggregate fees and expenses charged to the scheme:** For detailed fees and expenses charged to the scheme please refer to section- I Part - III 'C – Annual Scheme Recurring Expenses'.
- **Any safety net or guarantee provided:** There is no assurance OR guarantee of returns.

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations and Clause 1.14.1.4 of SEBI Master Circular for Mutual Funds dated June 27, 2024 the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and the Plan(s) / Option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Plan(s) / Option(s) thereunder and affect the interests of Unitholders is carried out unless:

- SEBI has reviewed and provided its comments on the proposal
- A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- The Unitholders are given an option for a period of atleast 30 calendar days to exit at the prevailing Net Asset Value without any exit load.

Under section 112A of the Act, where long term capital gain exceeds Rs. 1,25,000/- tax is payable @ 10% upto 22nd July, 2024 and 12.5% from 23rd July, 2024 onwards plus applicable surcharge and cess (without indexation benefit).

*without indexation benefit

+ With respect to an Equity Oriented Fund of Fund, units acquired post 1 April 2023 and sold prior to 31 March 2025 would be considered as units sold of a Specified Mutual Fund (SMF) as mentioned below and hence, any gains arising on transfer of such units would be deemed to be short-term capital gains. However, with respect to units acquired prior to 1 April 2023, gains arising on transfer of such units would not be considered as units sold of a Specified Mutual Fund (SMF) as mentioned below and would continue to be governed by the normal provisions (i.e., long-term or short-term, depending upon period of holding) as mentioned in the table above.

++ As per the amended Finance Bill 2023, a Specified Mutual Fund (SMF) acquired on or after April 1, 2023, shall be deemed to be short-term capital asset and hence, the gains arising on such transfer will be regarded as

short-term capital gains (STCG) irrespective of period of holding. SMF is a Mutual Fund holding less than 35% of its total investment in equity shares of domestic companies. Accordingly, Equity Fund of Fund investing in Equity ETF shall fall within the ambit of SMF and the gains arising on its transfer will be regarded as STCG and would be taxable at the rate of 15% (where transfer takes place before 23 July 2024) or 20% (where transfer takes place on or after 23 July 2024) (plus applicable surcharge and cess) and no indexation benefit will be available on transfer of such investments. However, effective 01 April 2025, the definition of ‘Specified Mutual Fund’ has been proposed to be amended as under:

- A mutual fund wherein more than 65% of total proceeds are invested in the debt and money market instruments; or
- Fund which invests 65% or more of its total proceeds in units of a fund referred in clause (a) above, calculated basis the annual average of the daily closing figures

As a result of the proposed amendment, Equity Fund of Fund investing in Equity ETF which were earlier covered under the definition of Special Mutual Fund will now get excluded from the definition. Thus, for Equity Fund of Fund investing in Equity ETF sold on or after 1 April 2025, the above provisions of specified mutual funds would not apply. However, capital gains on sale of mutual Funds investing more than 65% in debt and money market instruments or Fund which invests 65% or more of its total proceeds in units of such fund (hereinafter referred to as “Debt and Money Market Mutual Funds”) would continue to be deemed to be short-term capital gains.
